

South Austin Regional is Wastewater Treatment Plant of the Year

The Water Environment Association of Texas has awarded South Austin Regional (SAR) as Wastewater Treatment Plant of the Year in Category 3 (which is based on an annual average effluent flow of 39.3 million gallons per day). SAR was selected for this honor for achieving Gold and Silver levels of performance with National Pollutant Discharge Elimination permitting by the National Association of Clean Water Agencies, as well as compliance with Texas Commission for Environmental Quality regulations. While SAR was faced with staffing shortfalls due to COVID-19 and also severely tested by Winter Storm Uri, the persistence and tenacity of crews at SAR ensured the community was served with uninterrupted services and the health of the Colorado River was protected throughout these events.

MONTHLY PERFORMANCE DASHBOARD

A report highlighting key performance indicators

February 2022

Business Excellence & Innovation

My ATX Water, Austin's Smart Water Meter System is in full swing, working to install 250,000 new digital water meters city-wide between now and 2025. As of February more than 30,000 meters have been installed. Aclara, Austin Water's certified contractor, will hire additional technicians to increase the number of meter installs each month. Customers have also been signing up for the [My ATX Water portal](#), where they can see their water use data in near-real-time, receive water alerts, and find ways to save water and money. The portal is currently around a 50% adoption rate after customers receive their new meter.

Affordability

Austin Water continued a 10 percent reduction in water and wastewater rates for our most vulnerable low-income customers enrolled in the City of Austin's Customer Assistance Program (CAP) for the entirety of fiscal year 2022.

Affordability efforts continue as Austin Water implemented a multifamily CAP program in 2021 and continued debt management strategies for debt service savings.

Annual Residential Bill is to stay at or below 1.5 percent of Austin Median Household Income (MHI)

Product Quality

Drinking Water Quality Calendar Year 2022: Cloudiness of water (turbidity)

Measured turbidity "cloudiness of water" is the indicator of the effectiveness of our filtration systems.

Our target is to keep treated drinking water turbidity level at 0.10 Nephelometric Turbidity Unit (NTU) or less.

Wastewater Quality Calendar Year 2022:

Keeps the Carbonaceous Biological Oxygen Demand (CBOD) concentration from our wastewater treatment plants discharging at 3.0 mg/L or less.

Infrastructure Stability

Water Leak Management Index (Infrastructure Leak Index)

The current annual real losses divided by the unavoidable annual real losses. The data that this calculation is based on is derived from the annual water loss audit.

Annual Target: < 2.7

Reduce operational risks by successfully completing at least **80% of the Austin Water Capital Improvements Program** on identified priority infrastructure needs annually.

Percentage of actual CIP spending to budgeted CIP spending

Annual Target: > 80%

Facility Assets in Fair or Better Condition

The state of the assets that comprise the treatment, pumping, and storage facilities.

Annual Target: > 80%

Water Supply Sustainability

Austin's water use Gallons Per Capita per Day (gpcd)

Reclaimed Water Customers:

Customers using reclaimed wastewater for beneficial purposes.

- ◆ Provided reclaimed water for irrigation in 1974, making our system one of the oldest in the Texas
- ◆ Approximately **1.4 billion gallons** of water used in 2018, about 3% of the City's total water demand
- ◆ Consists of **63.4 miles** of reclaimed water transmission mains
- ◆ Future plans for the system consist of over **130 miles** of mains and over **8 billion gallons** used annually
