Austin Water Prepares For Wildfire Threat

Austin Water Wildlands Conservation staff conducted three prescribed burns this summer to mitigate risk of wildfire on 40,000+ acres used to protect groundwater in Central Texas. Prescribed burns improve the resiliency of the land when used as a seasonal management tool and can often result in greater biodiversity after the burns. For example, grassland birds like quail and northern harrier hawks benefit from open habitat found after a fire. Additionally, through a partnership with Austin Fire Department and the Austin Civilian Conservation Corps, construction and maintenance of shaded fuel breaks are underway to protect critical infrastructure from destructive wildfires.

MONTHLY PERFORMANCE DASHBOARD

A report highlighting key performance indicators

September 2021

Business Excellence & Innovation

My ATX Water, Austin’s Smart Water Meter System is in full swing, working to install 250,000 new digital water meters city-wide between now and 2025. As of September nearly 14,000 meters have been installed. Aclara, Austin Water’s certified contractor, will hire additional technicians to increase the number of meter installs each month. Customers have also been signing up for the My ATX Water portal, where they can see their water use data in near-real-time, receive water alerts, and find ways to save water and money. The portal is currently around a 50% adoption rate after customers receive their new meter.

Leak Detection Technology
Linear feet of leak detection performed on large diameter water transmission lines

Annual Target: > 36,960

Affordability

Reduced residential water and wastewater rates were extended through October 31, 2020. Austin Water continued a 10 percent reduction in water and wastewater rates for our most vulnerable low-income customers enrolled in the City of Austin’s Customer Assistance Program (CAP) for the entirety of fiscal year 2021.

Product Quality

Drinking Water Quality Calendar
Year 2020: Cloudiness of water (turbidity)
Measured turbidity “cloudiness of water” is the indicator of the effectiveness of our filtration systems.
Our target is to keep treated drinking water turbidity level at 0.10 Nephelometric Turbidity Unit (NTU) or less.

0.3 NTU - Permitted Level: less than 0.3 NTU
0.2 NTU
0.1 NTU - Utility Target: less than 0.1 NTU
0.0 NTU

Wastewater Quality Calendar
Year 2020
Keeps the Carbonaceous Biological Oxygen Demand (CBOD) concentration from our wastewater treatment plants discharging at 3.0 mg/L or less.

10 mg/l - Permitted Level: less than 10.0 mg/l
8 mg/l
6 mg/l
4 mg/l
2 mg/l - Utility Target: less than 3.0 mg/l
0 mg/l

Facility Assets in Fair or Better Condition
The state of the assets that comprise the treatment, pumping, and storage facilities.
Annual Target: > 80%

Reclaimed Water Customers:
Customers using reclaimed wastewater for beneficial purposes.
- Provided reclaimed water for irrigation in 1974, making our system one of the oldest in the Texas
- Approximately 1.4 billion gallons of water used in 2018, about 3% of the City’s total water demand
- Consists of 63.4 miles of reclaimed water transmission mains
- Future plans for the system consist of over 130 miles of mains and over 8 billion gallons used annually

New Conservation Measures Implemented
