Re: City of Austin Municipal Separate Storm Sewer System (MS4) System-wide Annual Report
Texas Pollutant Discharge Elimination System (TPDES) Permit No. WQ0004705000
(EPA I.D. No. TXS000401)

Dear Ms. Villalba,

Please find herewith for your review, the MS4 system-wide annual report for the City of Austin. The report has been prepared as required by Part IV.C. of the permit and includes the City's accomplishments during the reporting period from October 1, 2021 through September 30, 2022.

As required by Part IV.D and in accordance with Part V.B.8 of the permit, I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

If additional information related to any of the City's compliance activities described in the report should be required, please contact Ms. Julie White, TPDES Program Coordinator, at julie.white@austintexas.gov.

Sincerely,

Jorge L. Morales, P.E., CFM, Director
Watershed Protection Department

SYSTEM-WIDE OVERVIEW

The City of Austin (City) was originally issued a Municipal Separate Storm Sewer System (MS4) Storm Water Permit by the Environmental Protection Agency (EPA) in September 1998 (EPA ID. TXS000401). The City renewed the MS4 storm water permit with the Texas Commission on Environmental Quality (TCEQ) in February 2006 (WQ0004705000) and has continued to do so every 5 years as required since then. The TCEQ reissued the City's most recent MS4 storm water permit on August 15, 2018.

The City has continued to implement the compliance activities required by the storm water permit and as outlined in the City's Storm Water Management Program (SWMP). The City reports accomplishments executed during the City fiscal year, October 1st through September 30th of each year. The System-Wide Annual Report is due May 1st of each year. The city-wide permit is managed by the TPDES MS4 Coordinator in the Watershed Protection Department (WPD).

This report documents the City's compliance activities during the reporting period from October 1, 2021, to September 30, 2022; permit year 4 of the permit. Detailed information related to each minimum control measure (MCM) is included in this report along with associated required appendices.

Significant events to consider:

- SWMP: On August 25, 2022, the TCEQ approved the City's SWMP. The SWMP was approved with approximately one month left in the reporting period. The timing of the SWMP approval did not allow time for implementation of all newly established goals in FY22; however, the City has continued to implement all programs to the maximum extent practicable.
- Rain to River: WPD began community engagement for Rain to River, a strategic plan to protect Austin's creeks and communities. This plan will guide the work of Watershed Protection for the next ten years and help tackle critical issues like climate change and equity. Through its engagement plan, the department is seeking community feedback to help shape values, goals and priorities. Particular emphasis is being placed on hearing

from communities of color and other groups who have been left out of past planning efforts.

- Trash in Creeks Study: WPD staff completed an extensive study of trash in Austin creeks. Covering 110 miles of streams in 20 watersheds, the study documented the sources and distribution of trash in and near waterways. Single-use plastics, including plastic bags, were the most common items found. Another key finding was that trash tended to accumulate in some areas with approximately 75 percent of the trash found in only 10 percent of the study area. High concentrations of trash appear to be caused by the physical characteristics of the creek combined with a variety of trash sources. Trash tends to accumulate and stay in certain locations based on the characteristics of the creek, especially the amount of vegetation. Although the study was not able to identify a single easy-to-implement solution, it has increased our understanding and provided additional insight into strategies to address this problem.

a. MCM 1: MS4 Maintenance Activities

i. Structural Controls

Structural Control Inspection Program

Status of Implementation and Compliance

The Watershed Protection Department (WPD) is responsible for the operation, inspection, maintenance, and repair of the City's storm water drainage infrastructure. City and commercially owned Stormwater Control Measures (SCMs) are inspected by WPD. To ensure proper functionality of the SCMs, inspectors observe the condition of the site and structures, identify and prioritize structural issues, and document maintenance concerns such as excess vegetation or sediment.

SCM Inventory for FY 22 was as follows:

1101 City maintained SCMs

8439 Private owned and maintained SCMs

329 City maintained SCMs in Barton Springs Zone (BSZ)

357 Private owned and maintained SCMs in BSZ

During the reporting period, the following activities were accomplished:

 MCM 1 Maintenance Activities FY22 <i>Structural Control Inspections</i>				
Activity/BMP	Quantifiable Goal	Achievement	Completion	Department
Inspections of City maintained stormwater control measures	90% of the SCMs maintained by the WPD will be inspected every year.	1013 (92%) inspections conducted	September 30, 2022	WPD (PIDS)
Inspect privately owned stormwater control measures.	Inspect 33% privately maintained SCMs per year.	2825 (34%) inspections conducted	September 30, 2022	WPD (PIDS)
Inspect City maintained facilities within the BSZ and perform necessary maintenance.	90% of the SCMs maintained by the WPD within the BSZ will be inspected every year.	329 (100%) inspections conducted	September 30, 2022	WPD (PIDS)
Inspect private sites subject to the BSZ operating permit	90% of private SCMs within the BSZ will be inspected every year.	357 (100%) inspections conducted	September 30, 2022	WPD (PIDS)

Summary of enforcement actions

590 Notices of Violation issued

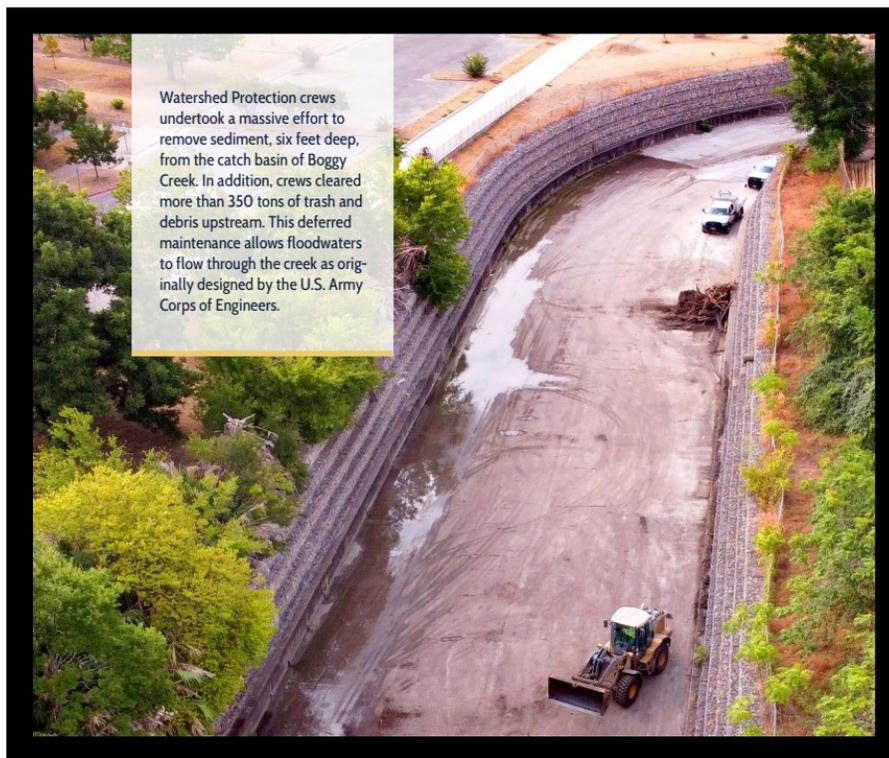

47 Notice of Violations issued for SCMs subject to the BSZOP

The SCMs subject to the BSZOP receive additional oversight by WPD staff including SCM design review and construction inspection. Additionally, the post construction inspections for BSZOP sites are extensive. A total of 819 post construction site visits were conducted on the 357 SCMs in the BSZOP program.

Structural Control Maintenance

Status of Compliance and Implementation

The Watershed Protection Department (WPD) is responsible for the operation, inspection, maintenance, and repair of the City's storm water drainage infrastructure and open waterways. WPD assets that are maintained include stormwater pipes, inlets, culverts, bridges, and ponds. Sediment, vegetation, debris, and other obstructions are removed to ensure proper flow and function of WPD assets. These activities are part of a comprehensive maintenance plan to identify, evaluate, and solve flooding, erosion, and water quality problems.

During the reporting period, the following activities were accomplished:

 MCM 1 Maintenance Activities FY22 <i>Structural Control Maintenance</i>				
Activity/BMP	Quantifiable Goal	Achievement	Completion	Department
Open channel vegetation management	Routine maintenance on 70% of Vegetation Control Program (VCP) sites	32% VCP sites maintained	September 30, 2022	WPD (Green Infrastructure)
Perform inspections on storm drain inlets	Inspect and clean at least 2,500 inlets and remove collected sediments and other pollutants	6,837 inlets inspected and cleaned	September 30, 2022	WPD (Closed Systems)
Perform inspections on storm drain pipeline system	Inspect and clean at least four miles (21,120 ft.) of the City of Austin storm drain pipeline system annually	15.87 miles inspected and cleaned	September 30, 2022	WPD (Closed Systems)
Routine vegetation management of City stormwater control measures(SCMs)	Manage vegetation at 70% of SCMs managed under the VCP program	47% SCM vegetation managed under VCP program	September 30, 2022	WPD (Green Infrastructure)
Culvert and bridge obstruction management	Remove debris, sediment, vegetation, and obstructions from at least 500 culvert and bridge locations to maintain flood flow conveyance	221 locations maintained	September 30, 2022	WPD (Open Waterways)
Open waterway obstruction management	Clear a minimum of 3 miles of open waterways of excess sediment and obstructions to maintain flood flow conveyance	3.8229 miles maintained	September 30, 2022	WPD (Open Waterways)

Green Infrastructure: While developing and negotiating a new contract (which took a year), there was not a contractor that could maintain all sites, therefore, many sites received only 1-2 cuts, instead of the routine 3-6 cuts.

An additional contract maintained by WPD resulting in the removal of 264,000 lbs of trash and debris from WPD assets.

ii. Floatables

WPD operates a floatables program that has established litter collection sites at the mouth of two urban creeks, Shoal Creek and West Bouldin Creek, just prior to their discharge into Lady Bird Lake.

WPD inspects the booms and when necessary, crews remove all trapped floating material using equipment that can reach the middle of the creek from both sides of the bank. The material removed from each site is loaded into City dump trucks, hauled to a local landfill for proper disposal, and measured by weight at the disposal site.

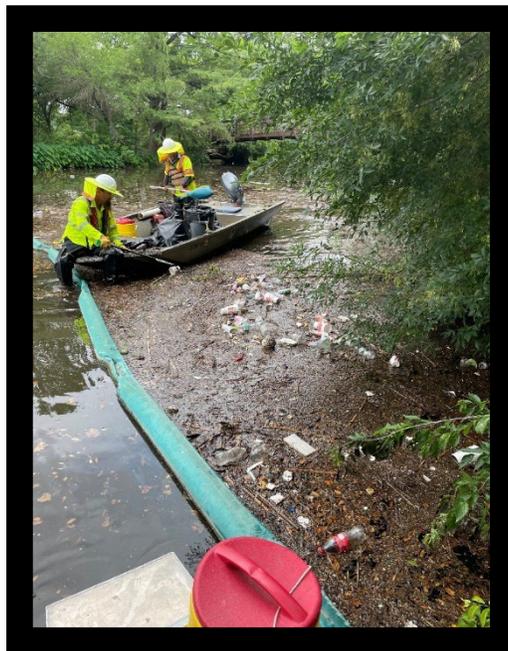

Status of Compliance and Implementation

During the reporting period, the following activities were accomplished:

 MCM 1 Maintenance Activities FY22 <i>Floatables</i>				
Activity/BMP	Quantifiable Target	Achievement	Completion	Department
Inspection of boom	Inspect 100% of monitoring booms sites	100% inspections conducted weekly*	September 30, 2022	WPD
Cleaning of boom sites	Clean 100% of boom sites, if necessary	3.69 tons of material retrieved from booms	September 30, 2022	WPD

*Inspections are not conducted around holidays

WPD crews and other partners removed 29.65 tons of material from other areas of Lady Bird

iii. Roadways

Status of Implementation and Compliance

The Public Works Department (PWD) and Austin Resource Recovery (ARR) maintain public roadways and right of ways (ROWs) to minimize the discharge of pollutants. The Roadways Program under PWD includes the implementation of Best Management Practices (BMP) for road repair and snow and ice management. ARR ensures pollutant removal activities such as street sweeping, litter collection, illegally dumped waste, and dead animal removal are implemented within the public ROW.

During the reporting period, the following activities were accomplished:

 MCM 1 Maintenance Activities FY22 Roadways				
Activity/BMP	Quantifiable Target	Achievement	Completion	Department
Clean trash, leaves, dirt, and debris, from roadways	Sweep 100% of City-owned public streets*	100% of streets swept. 2,823 tons of litter removed	September 30, 2022	ARR
Litter Removal	100% of City owned litter containers in the ROW downtown will be emptied*	418 tons of litter removed from City containers and dumpsites	September 30, 2022	ARR
Remove litter from City-maintained streets and ROW	Respond to 100% of complaints in known problem areas*	92 complaints received/ 92 complaint responses	September 30, 2022	ARR
Remove trash and debris due to illegal dumping on public property	Removal of 100% of known illegally dumped trash and waste material on public property*	418 tons of known illegally dumped waste removed (includes city containers). 636 illegal dump site clean ups.	September 30, 2022	ARR
Removal of dead animals on City-maintained ROW 7 days a week	100% removal of known dead animals on City-maintained ROW*	51 tons of known dead animals removed from roadways	September 30, 2022	ARR
Collection of residential brush and bulk on scheduled basis	100% collection of residential brush and bulk on a scheduled basis*	5,636 tons of brush and 8,454 tons of bulk collected.	September 30, 2022	ARR

*ARR always strives to accomplish 100% of all goals; however, in the occurrence of a shortage of multiple staff members, weather emergencies, or other unforeseen extenuating circumstances, 75% of streets will be swept and 90% of other goals will be achieved.

ARR also collected a total of 43,479 tons of yard trimmings which includes compost totals from residences during weekly collection activities.

Public Works Department (PWD)

The Roadways Program under PWD includes the implementation of Best Management Practices (BMP) for road repair and snow and ice management.

Status of Implementation and Compliance

During FY22, no changes to PWD programs were made. PWD responded to inclement winter weather events February 4th and 5th and then again on February 24th, 2022. This resulted in the application of dolomite on a very limited number of roadway segments including elevated structures. Work orders were subsequently created for the sweeping and reclaiming of the material post event.

No changes to the SWMP for MCM1 programs are being proposed at this time.

b. MCM 2: Post-Construction Stormwater Control Measures (SCMs)

i. Areas of New Development & Significant Redevelopment

Multiple departments implement comprehensive oversight of land development process requirements, regulatory compliance, and enforce programs to ensure the proper operation and maintenance of controls after new or redevelopment is complete. This is achieved through ordinances, water quality regulations, and policies.

Development Services Department (DSD)

Status of Implementation and Compliance

New development and redevelopment activities in the City of Austin’s planning jurisdiction are subject to internal review for compliance with water quality regulations of the Austin City Code. DSD ensures the review of site development plan applications, subdivision plans, and proposed utility projects for compliance with the water quality regulations of the City’s land development code.

During the reporting period, the following activities were accomplished:

 MCM 2 Post-Construction SCMs FY22 <i>Areas of New Development and Significant Redevelopment</i>				
Activity/BMP	Quantifiable Target	Achievement	Completion	Department
Subdivision application review	Review 100% of applications received	555 Subdivision applications reviewed within 180 days of receipt (100%)	Within 180 days of receipt of subdivision application	DSD
Site plan and school plan application review	Review 100% of applications received	2071 Site plan reviewed within 180 days of receipt (100%) 24 school plan applications reviewed within 180 days of receipt (100%)	Within 180 days of receipt of site plan or school plan application	DSD
General Permit application review	Review 100% of applications received	451 General Permit applications reviewed within 180 days of receipt (100%)	Within 180 days of receipt of application	DSD

A comprehensive training program with 30-60-90-day goals has been developed to promote thorough and consistent training of new employees. Additionally, all environmental reviewers regularly meet to discuss projects, ask questions, and to promote the consistent application of Code and Criteria.

Planning Department (PD)

Status of Implementation and Compliance

PD is responsible for most comprehensive planning activities, including ongoing planning support in areas such as land use inventories, mapping, and analysis; population and demographic forecasting; neighborhood planning; and transportation planning. HPD staff review zoning cases.

During the reporting period, the following activities were accomplished:

 MCM 2 Post-Construction SCMs FY22 <i>Areas of New Development and Significant Redevelopment</i>				
Activity/BMP	Quantifiable Target	Achievement	Completion	Department
Zoning application review	Review 100% of applications received	179 Zoning applications reviewed within 181 days of receipt	September 30, 2022	PD

From October 1, 2021, to September 30, 2022, the City of Austin experienced a net growth of 19,180 persons to reach a total population of 995,722. This increase represents a 1.96% annual growth rate and is up from an annual increase of 1.02% from the previous year. The population for the Metropolitan Statistical Area on September 30, 2022, was 2,412,572.

During the reporting period the net acres annexed were as follows:

- 11.9 acres converted from limited purpose to full purpose
- 50.91 acres added to limited purpose
- 5,526.09 total acreage added to the city limits in FY22

Watershed Protection Department (WPD)

Status of Implementation and Compliance

The Watershed Protection Department (WPD) reviews plans for construction of water quality controls over the Barton Springs Zone. Operating Permit applications are technically reviewed to determine compliance with City code and inspections are conducted during construction.

During the reporting period, the following activities were accomplished:

 MCM 2 Post Construction Stormwater Controls FY22 <i>Areas of New Development and Significant Redevelopment</i>				
Activity/BMP	Quantifiable Target	Achievement	Completion	Department
Operating Permit Barton Springs Zone application review	Review 100% of applications received	100% (13 reviews) of applications reviewed within 180 days of receipt	September 30, 2022	WPD

WPD is continually working to improve code/criteria to enhance SCM performance. One example of these improvements was eliminating clay liners so retention irrigation ponds or any other ponds over the Edwards Aquifer Recharge Zone. This small criteria change will allow these ponds over one of the critical parts of Austin to function better.

ii. Regulatory Mechanism Evaluation

The City implements a thorough review of applications for development with dedicated staff that focus on protecting water quality and sensitive features.

In addition to regulations applied during the review process, multiple departments conduct inspections of construction sites, industrial facilities, private ponds, on-site septic facilities, and hazardous materials storage facilities. Inspections are also conducted in response to allegations of pollutant discharges or emergency response incidents with spills of hazardous materials. All departments that implement these programs have mechanisms through code to initiate enforcement to achieve compliance.

No changes to the regulatory mechanism are required at this time.

iii. Stormwater Control Measures (SCMs)

(referred to in permit as “Flood Control Projects”)

Status of Implementation and Compliance

WPD assesses existing and planned SCMs. WPD staff continues to ensure City code and criteria elements in proposed SCM projects and evaluate existing SCM facilities for water quantity and quality retrofit opportunities.

The WPD considers retrofit projects to improve areas that developed prior to modern regulations. These projects include retrofits to SCMs intended to reduce pollution, flood risk, and prevent erosion caused by existing development.

Stormwater control facilities are evaluated utilizing existing asset condition assessment and maintenance records along with the following evaluation criteria:

- General size and layout
- Drainage area size and pollutant load
- Opportunities for BMP integration with existing features

No specific schedule is set for retrofit evaluations as it is done in conjunction with other planning processes.

During the reporting period, the following activities were accomplished:

 MCM 2 Post Construction Stormwater Controls FY22 <i>Stormwater Control Measures</i>				
Activity/BMP	Quantifiable Target	Achievement	Completion	Department
Evaluate multi-purpose functions in WPD infrastructure projects	The incorporation of multi-purpose functions (water quality, flood, erosion) will be evaluated in 100% of WPD watershed infrastructure projects.	Multi-purpose functions were evaluated in 100% of WPD infrastructure projects	September 30, 2022	WPD

In addition to evaluating all projects for potential incorporation of multi-use function, the department completed work to repair and improve the functioning of six ponds. Some examples are shown below.

Bull Creek - West Rim Dr Water Quality Pond 2

Harris Branch - Retreat at Tech Ridge Water Quality Pond Repair Outfalls

Dam Safety Program

Status of Implementation and Compliance

WPD maintains an inventory of City owned dams and conducts inspections at each dam under the supervision of an engineer. WPD staff also participate in inspections with the TCEQ Dam Safety Program.

During the reporting period, the following activities were accomplished:

 MCM 2 Post Construction Stormwater Controls FY22 <i>Stormwater Control Measures</i>				
Activity/BMP	Quantifiable Target	Achievement	Completion	Department
Dam Safety Inspections	Inspect 100% of the 33 TCEQ regulated dams under the supervision of a P.E	100% (33) Inspections conducted	September 30, 2022	WPD

A routine inspection program is crucial to identify potential problems and get them addressed before a failure. We inspect these dams at least once annually and work with our Field Operations Division to address immediate concerns..

WPD has several new dam restoration/modernization projects that originated in FY 22. New project designs have started on Duval East and West dam, Lincolnshire dam # 1 & 2, and many other dam improvement projects are in the works.

No changes to the SWMP related to MCM2 programs are being proposed at this time.

c. MCM 3: Illicit Discharges Detection and Elimination (IDDE)

i. Illicit and Allowable Discharges

ii. Detection and Elimination of Illicit Discharges

vi. MS4 Screening and Illicit Discharge Inspection Program

ix. Spill Prevention and Response

Watershed Protection Department (WPD)

Status of Implementation and Compliance

WPD maintains rapid response capabilities for the investigation of environmental emergencies. WPD also responds to non-emergency pollution complaints. Notification of spills are primarily received from the Austin Fire Department (AFD), citizen calls to the WPD Pollution Hotline or Austin 311, the Texas Commission on Environmental Quality (TCEQ), Travis County, referrals from other WPD staff, and Austin Water. WPD staff are available to receive notification of spills 24 hours a day, every day of the year. WPD hotline and Austin 311 operates on a 24-hour basis, thus allowing for after-hours notification of environmental emergencies.

WPD has developed a categorization system for illegal discharges that are reported based on the severity of the incident and the potential to pollute surface water or storm water. The two incident categories are:

- *Priority Incidents* - which pose an immediate threat to water quality, and
- *Non-priority Incidents* - which do not pose an immediate threat to water quality.

WPD responded to:

- 425 priority incidents.
- 524 non-priority incidents.

WPD recovered:

- 2,824,420 gallons
- 283 cubic yards of pollutants

WPD detected and corrected:

- 3 illicit plumbing connection

WPD receives approval requests for the discharge of non-stormwater discharges to the City MS4. WPD reviews each request and determines if it is an allowable non-stormwater discharge and if appropriate BMPs are planned for the discharge. WPD may recommend additional BMPs and approves or denies the request for discharge.

During the reporting period, the following activities were accomplished:

 MCM 3 Illicit Discharge Detection & Elimination FY22 <i>Spill Prevention and Response</i>				
Activity/BMP	Quantifiable Target	Achievement	Completion	Department
Spill Response program	Investigate 100% of observed or reported applicable accidental spills and illicit discharges that may enter the MS4.	949 Investigations conducted 19 Investigations conducted in the Barton Springs Recharge Zone (BSRZ) 949 Incident notifications received	September 30, 2022	WPD
Non-Stormwater Discharge Review program	Respond to 100% of requests to discharge non-stormwaters to MS4.	20 Non-storm water discharge reviews 20 Non-stormwater discharge requests received	September 30, 2022	WPD

Summary of enforcement actions

- 148 Notices of Violation issued
- 3 Citations issued
- 5 Enforcement actions over the BSRZ
- 8 Referrals to other enforcement agencies

Two additional illicit connections were discovered and were temporarily blocked off to prevent any discharges. These connections are still in the process of getting permanently corrected.

WQC FY 21-22 POLLUTANTS BY TYPE

IDDE investigations resulted in this breakdown of pollutants by type

Austin Fire Department Special Operations

Status of Implementation and Compliance

The Austin Fire Department's (AFD) hazardous materials response is conducted by the Special Operations Division. The Special Operations Division specializes in maintaining response capabilities to hazardous material spills or other incidents that may endanger human health and safety within the city limits. AFD works closely with the Watershed Protection Department to implement controls during an emergency to reduce the discharge of pollutants from entering a storm sewer conveyance or water body.

During the reporting period, the following activities were accomplished:

 MCM 3 Illicit Discharge Detection & Elimination FY22 <i>Spill Prevention and Response</i>				
Activity/BMP	Quantifiable Target	Achievement	Completion	Department
Hazardous Material Incident Response	Respond to 100% of reported incidents	Responded to 2,599 incidents 98 Incidents were at facilities with AFD Hazardous Material Permits	September 30, 2022	AFD

iii. Priority Areas

WPD uses collected data on pollution type, volume, and location to produce a heat map/hotspot map (Pollutant Data Spatial Viewer) that helps indicate areas where illicit discharges are likely to occur. Spatial and traditional analysis and historical data trends identified the following general areas to have a higher probability of polluting illicit discharges:

- High population density areas, particularly the urban core;
- Transportation corridors;
- Active construction sites; and
- Areas with aging water and wastewater infrastructure.

The Pollutant Data Spatial Viewer is utilized for prioritizing dry weather screening and community outreach areas. This map is maintained by WPD and is readily available upon request.

iv. Overflows and Infiltration

Wastewater Pipelines

Status of Implementation and Compliance

Austin Water Utility Department (AW) is responsible for maintaining the integrity of the wastewater collection system to prevent the infiltration or seepage of wastewater into the storm sewer system and waterways. This task is accomplished by using flow monitoring, television inspection, smoke testing, dye testing, creek surveys associated with sewer line crossings, cleaning sewer lines, and working with the Watershed Protection Department (WPD) to determine the location and sources of seepage, exfiltration, and infiltration.

During the reporting period, the following activities were accomplished:

 MCM 3 Illicit Discharge Detection and Elimination FY22 Overflows and Infiltration - Wastewater Pipelines				
Activity/BMP	Quantifiable Target	Achievement	Completion	Department
Respond to wastewater emergencies	Respond to overflow emergencies within 1 hour 95% of the time.	379 Emergency response incidents. 93% of emergencies responded to within 1 hour	September 30, 2022	AW
Clean wastewater lines	Clean 5% of wastewater lines	2,110,703 Linear feet cleaned 12% of wastewater lines cleaned	September 30, 2022	AW
TV inspect and score gravity collection lines	Inspect 5% of wastewater lines	2,418,117 linear feet inspected 14% of wastewater lines inspected	September 30, 2022	AW
Inspect manholes to ascertain integrity	Inspect 5% of manholes	3,536 manholes inspected 5.5% of manholes inspected	September 30, 2022	AW
Smoke Testing	Smoke test 1% of wastewater lines	1,661,138 linear feet tested 10% of wastewater lines tested	September 30, 2022	AW
Inspect City Owned Lift Stations	Inspect 100% of City lift stations	113 City Lift stations 100% inspected weekly	Weekly	AW
Televise collection system located in the EARZ	Televise 100% of the collection system in the EARZ	96.2% televised (still in 5-year period)	Once every 5 years	AW

AW had major emergencies occurring simultaneously during the reporting period which made the 1-hour response time goal difficult to achieve.

On-Site Sewage Facilities (OSSFs)

Status of Implementation and Compliance

Austin Water is responsible for the regulation of OSSFs located within the City of Austin's full purpose jurisdiction and limited purpose annexation areas where health and safety codes apply. The Texas Commission on Environmental Quality (TCEQ) has granted AW the authority to implement and enforce the OSSF regulations outlined in Title 30 of the Texas Administrative Code (TAC) Chapter 285. The focus of the program is to abate and/or prevent pollution and protect public health from the use of inadequate and/or failing private sewage facilities.

During the reporting period, the following activities were accomplished:

 MCM 3 Illicit Discharge Detection and Elimination FY22 <i>Overflows and Infiltration - Septic Systems</i>				
Activity/BMP	Quantifiable Target	Achievement	Completion	Department
OSSFs Inspected (development driven)	Complete construction inspections within 24 hours (or next business day) of request	108 inspections conducted within 24 hours/next business day (100%)	September 30, 2022	AW
OSSFs Permitted (development driven)	Issued permits within 30 calendar days of receiving a complete application	53 permits issued within 30 days of complete application (100%)	September 30, 2022	AW
Investigation and Enforcement Actions (customer driven)	Respond to 100% of complaints or notices of potential violation	2 complaint investigations conducted, and 2 complaint notices received (100%)	September 30, 2022	AW
Investigation of illegal discharges (customer driven)	Respond to 100% of complaints or notices of potential violation	2 complaint investigations conducted, and 2 complaint notices received (100%)	September 30, 2022	AW

During the reporting period, 49 OSSFs were abandoned, and service was connected to the City's wastewater collection system. Eight septic tanks were abandoned in preparation for development or because they were no longer functioning as septic tanks.

Summary of enforcement actions

13 Notices of Violation issued

v. Household Hazardous Waste & Used Motor Vehicle Fluids

Status of Implementation and Compliance

The Austin Resource Recovery (ARR) Department operates a Recycle and Reuse Dropoff Center (RRDOC) serving residents of Austin and Travis County. The RRDOC is a permanent facility offering services throughout the week. ARR also assists customers who require home pickups or other accommodations. Participation levels have increased from 450 households at the initial event to 31,171 households serviced in Fiscal Year 2022 (FY22). The operation of the RRDOC provides a location for proper disposal to reduce occurrences of illegal dumping. Approximately 1,908,540 pounds of household hazardous waste were diverted from City municipal waste streams in FY22.

During the reporting period, the following activities were accomplished:

 MCM 3 Illicit Discharge Elimination and Detection FY22 <i>Household Hazardous Waste & Used Motor Vehicle Fluids</i>				
Activity/BMP	Quantifiable Target	Achievement	Completion	Department
Remove oil from waste stream	Accept 100% of used residential motor oil dropped off at facility by Austin residents	106,207 pounds of waste oil recycled and 1,650 pounds of oil filters recycled	September 30 th , 2022	ARR
Remove hazardous materials from waste stream	Accept 100% of residential hazardous waste dropped off at the facility by Austin residents	1,908,540 pounds of hazardous waste accepted	September 30 th , 2022	ARR
Offer HHW collection services to City of Austin residents	Serve 100% of Austin residents that schedule an appointment for drop off HHW	31,171 households participated in drop-off or pick-up services	September 30 th , 2022	ARR

Additional items accepted for disposal:

- Disposed of 774,793 pounds of flammable materials.
- Disposed of 42,180 pounds of corrosive materials.
- Recycled 424,538 pounds of materials, this does not include paint.
- Recycled 258,619 pounds of paint.

The RRDOC is piloting a program to provide a door-to-door pick up service of household hazardous waste. This will help address the issue of the RRDOC being in Southeast Austin, away from the growing population in Northwest Austin. Additional staff and equipment has been brought onboard to complete this pilot program. The pilot is providing data to be used to help determine the most efficient method of collecting Household Hazardous Waste for the City of Austin and its residents.

No changes to the SWMP related to MCM3 programs are being proposed at this time.

d. MCM 4. Pollution Prevention/Good Housekeeping for Municipal Operations

i. Pollution Prevention/Good Housekeeping Program

Inspection Program

Status of Implementation and Compliance

The Watershed Protection Department (WPD) screens a list of all City properties and facilities to identify and prioritize city locations that could potentially contribute pollutants in storm water runoff. Staff inspects these City properties and facilities on a rotational basis and provides training upon request of storm water best management practices to staff in various city departments.

During the reporting period, the following activities were accomplished:

- Conducted 11 site visits of City owned properties to verify compliance with storm water regulations
- Assisted City of Austin Parks and Recreation staff with end-of-season swimming pool water discharges at 12 city owned swimming pools by testing the water to ensure complete removal of chlorine prior to releasing the water to area waterways
- Assisted with special events; coordinating with event staff to identify appropriate BMP's and pollution prevention measures for each event
- Conducted 7 stormwater inspections at City of Austin Fleet Service Centers
- Conducted a stormwater facility inspection at the Austin Water Fuel Island on Koenig Land and a closure inspection for St. Johns Neighborhood Pool

Training Program

Status of Implementation and Compliance

A Compliance Plan was approved by the TCEQ Austin Region Office on August 5, 2020, following a Notice of Violation documented by the TCEQ during an audit conducted in January 2020. Reporting year FY22 is *Year 3* of the Compliance Plan and Permit *Year 4*.

Departments implementing training programs include:

- Austin Fire Department

- Austin Resource Recovery Department
- Austin Water Utility
- Austin-Bergstrom International Airport
- Fleet Services
- Parks and Recreation Department
- Public Works Department
- Watershed Protection Department

During the reporting period, Compliance Plan Year 4, the following activities were accomplished:

- Training team meeting was held with each department to determine needs
- Verified key personnel within each department that will organize training
- Finalized customized training materials, activities, and schedules
- Initiated department-specific customized training activities
- No training requests to WPD were made by other departments during this period

 MCM 4 Pollution Prevention and Good Housekeeping for Municipal Operations FY22 City-Wide Training Program				
Activity/BMP	Quantifiable Target	Achievement	Completion	Departments
Training program for employees responsible for daily operations at applicable municipal locations.	Conduct 1 training	Each department conducted 1 training for applicable employees	September 30, 2022	WPD, ARR, PWD, AFD, AUS, Fleet, PARD, AW

All relevant departments succeeded in providing training to applicable employees for the first-year training requirement per the compliance plan. Team members are sharing experiences and considering training program improvements based on lessons learned during program development.

ii. Structural Control Maintenance

Please refer to MCM2, Section a. MS4 Maintenance Activities.

iii. Waste Handling

The City of Austin continues to properly dispose of waste that is removed from the MS4 and other municipal operations. This includes waste from the maintenance of storm water structural controls, floatables removed, and accumulations in storm sewer pipes and drains.

Material removed from the maintenance of City storm water structural controls is taken to an authorized landfill. When maintaining closed systems such as storm sewer pipes and drains, WPD vacuum trucks remove material and transport it to a WPD maintenance facility where the material is allowed to dewater in designated areas. The solids are taken to an authorized landfill.

ARR and PWD take all litter and debris picked up from the right of way and streets to an authorized landfill.

iv. Pesticide, Herbicide and Fertilizer Application

Status of Implementation and Compliance

The Integrated Pest Management (IPM) Program is a Citywide program that coordinates educational outreach activities and provides information to Texas Department of Agriculture licensed pesticide applicators, retail nurseries, the landscaping community, City land managers and staff, and the public to promote responsible pesticide, herbicide, and fertilizer management practices. The IPM Program is managed by WPD.

IPM plans are required to be submitted to WPD for review when one or more of the following conditions exist:

- as required in the land development review process
- when required by a City Board or City Council
- when land development occurs over the Barton Springs Zone
- when written into a development agreement
- on intensive landscape management sites such as athletic fields and golf courses

During the reporting period, the following activities were accomplished:

 MCM 4 Pollution Prevention and Good Housekeeping for Municipal Operations FY22 <i>Pesticide, Herbicide, and Fertilizer Application</i>				
Activity/BMP	Quantifiable Target	Achievement	Completion	Department
IPM Plan Review	Review 100% of IPM plans submitted through the development review process.	108 plans reviewed 108 plans received	September 30, 2022	WPD
Distribute Grow Green educational information	10 locations	Distributed information at 56 locations	September 30, 2022	WPD
Educate Landscape Professionals	1 class	Two class(es) held on Harmful Algae in Austin's Water related to Lawn Care – October; Grow Green to Keep Our Water Clean May 2022	September 30, 2022	WPD

- WPD Education staff distributed brochures and other IPM materials to the public, retailers, and City locations; all outreach materials are available at www.growgreen.org. The Grow Green website received 128,976 hits during this period.
- Pest-related questions from citizens are responded to with a phone call or an email.
- Provided Structural Pest Control Service support:
 - Austin Water's Center for Environmental Research, a partnership of the City of Austin, The University of Texas at Austin, and Texas A&M University hosted the Texas Department of Agriculture Structural Pest Control Service's Austin area exams and classes on Texas A&M AgriLife Extension Service Agricultural & Environmental Safety Structural Pesticide Applicator Training (Technician) (Dr. Rennie) March 2, 2022 April 6, 2022 July 20, 2022 September 7, 2022 Texas A&M AgriLife Extension Service Agricultural & Environmental Safety Lawn & Ornamental (Landscape Maintenance) (Dr. Matocha) May 4, 2022 August 17, 2022 November 2, 2022 Texas A&M AgriLife Extension Service Agricultural & Environmental Safety Vegetation Management Category Training (Dr. Matocha) May 11, 2022 October 5, 2022

Texas A&M AgriLife Extension Service Agricultural & Environmental Safety Pest Category (Dr. Jones) March 23, 2022 June 15, 2022 August 31, 2022 Texas A&M AgriLife Extension Service Agricultural & Environmental Safety Termite Category (Dr. Jones) March 24, 2022 June 16, 2022 September 1, 2022 .These Structural Pest Control Service classes and exams are provided for Austin area pest control and landscape management businesses, local school district employees and local governmental agency staff involved in pest control and landscape maintenance. Structural Pest Control Service training emphasizes the use of Integrated Pest Management for pest control, termite control, structural fumigation and weed control to reduce the use of chemicals in the environment.

- Collaborated with the Texas A&M AgriLife Extension, Travis County on a Texas Department of Agriculture continuing education units training with focus on urban pest issues including landscape pest management, herbicides, and invasive brush control, minimizing pest pressures in turfgrass, turf diseases, oak wilt, and laws and regulations.
- Administered the internal IPM Program, providing guidance to various City departments related to pest management activities.

No changes to the SWMP related to MCM4 programs are being proposed at this time.

e. MCM 5: Industrial and High-Risk Runoff

i. Priorities and Procedures for Inspections and Implementing Control Measures

Status of Implementation and Compliance

The Watershed Protection Department (WPD), Austin Fire Department (AFD), Development Services Department, and Austin Water Utility (AW) implement industrial facility permitting and inspection programs that are supported by enforcement protocols. Details surrounding these programs have been established in the SWMP and accomplishments for each of the programs are discussed below.

Watershed Protection Department

Status of Implementation and Compliance

Stormwater Discharge Permit Program

Specific commercial and industrial operations within the City of Austin full purpose jurisdiction are permitted to ensure compliance with City Codes that protect water quality. WPD also inspects entities covered under the program. Inspectors locate, verify, and monitor plumbing connections to the City storm sewer system and receiving waterways to prevent illegal discharges of commercial or industrial wastes. Inspectors also observe waste storage, handling, and disposal practices as well as verify and recommend best management practices to prevent pollutant discharges. The operational condition of water quality controls such as oil/grit separators, stormwater conveyances and ponds, and hazardous material interceptors are assessed.

TPDES Multi-Sector General Permit (MSGP) Inspection Program

WPD maintains records obtained from TCEQ Central Registry of facilities that have obtained coverage under the MSGP by submitting a Notice of Intent (NOI) or No Exposure Certification (NEC) to the TCEQ. WPD tracks permitted facilities that are discharging to the City's MS4 within the Austin full purpose jurisdiction.

Inspections are conducted by WPD staff of permitted NOI and NEC facilities on a routine basis. WPD also conducts desktop reviews of businesses that have submitted information to the State Comptroller's Office indicating that they are operating under a Standard Industrial Classification (SIC) that requires TPDES MSGP coverage. Facilities that appear to require coverage under the TPDES MSGP are scheduled for inspection.

The City does not conduct industrial and high-risk monitoring at these facilities and instead has chosen the option in the permit to conduct inspections at permitted facilities that maintain either an NOI or NEC.

Municipal Landfills Program

WPD is responsible for tracking remediation activities at selected sites. During the reporting period, WPD continued monitoring and mitigation activities when warranted at the following locations:

- **Lott Avenue Dump Site** – This small dumping area was discovered in early 2010 as a result of a citizen complaint regarding trash in a tributary of Fort Branch Creek. After large areas of surface dumping were removed from the stream channel by WPD; buried waste was discovered in the banks of the creek in several areas. The waste appears to be ash from burned municipal-type waste. In 2012, the City began the design phase of remediation for the site and in FY22, the streambank stabilization waste removal project was completed.
- **Butler Landfill** – The Butler Landfill is located on City parkland on the southern shore of Lady Bird Lake near the MoPac Expressway Bridge. The landfill was operated by the City from 1948 to 1967 exclusively for municipal waste. On May 6, 2022, the Texas Commission on Environmental Quality (TCEQ) issued an authorization to disturb the Butler Landfill. The City, working with contractor C3 Presents, initiated maintenance repairs of erosion of the landfill covering in July 2022.

During the reporting period, the following activities were accomplished:

 MCM 5 Industrial and High-Risk Runoff FY22 Stormwater Inspection Program				
Activity/BMP	Quantifiable Target	Achievement	Completion	Department
Landfill Complaint Investigations	Respond to 100% of landfill complaints received	0 complaint investigations conducted 0 complaints received	September 30, 2022	WPD
City Stormwater Discharge Permit (High Risk Facilities)	Issue COA Stormwater Discharge Permit to 100% of identified high-risk operations in full purpose area	918 stormwater discharge permits issued (100%)	January 31, 2022	WPD
	Inspect 10% of facilities with a City Stormwater Discharge Permit	133 stormwater discharge permit inspections conducted (15%)	September 30, 2022	WPD
TPDES TXR050000 and TXG110000 (Industrial Facilities)	Inspect 20% of facilities with NOI or NEC	16 NOI inspections conducted (23%) 16 NEC inspections conducted (39%)	September 30, 2022	WPD
	Screen 100 unpermitted businesses from Comptroller's list for permit eligibility.	167 unpermitted businesses screened from Comptroller list		WPD

Summary of enforcement actions

3 Notices of Violation issued

0 Citations issued

0 Referrals to other enforcement agencies

Approximately 269.7 gallons and 0.05 cubic yards of pollutants were recovered as a result of inspections. There were no illicit plumbing connections detected and corrected during inspections by staff.

Development Services Department

Status of Implementation and Compliance

Underground Storage Tank (UST) Leak Protection Program

DSD continued to focus efforts on all permittable facilities with USTs found within the Barton Spring Zone (BSZ) and the full purpose city jurisdiction. DSD conducted inspections of identified facilities and new construction to ensure compliance with City Water Quality Code. Inspectors review the implementation of Best Management Practices (BMPs) for proper storage, monitoring, and leak detection activities. DSD recommended BMPs and provided educational materials applicable to each operation during permit renewals.

DSD UST Inventory for FY 22

55 UST Construction Permits

110 UST Renewal Applications

0 Identified USTs

16 New USTs Installed

During the reporting period, the following activities were accomplished:

 MCM 5 Industrial and High-Risk Runoff FY22 Stormwater Inspection Program				
Activity/BMP	Quantifiable Target	Achievement	Completion	Department
Underground Storage Tank Construction Permits Reviewed	Review all UST Construction permits within 30 days	100% UST Construction permits reviewed within 30 days	September 30, 2022	DSD
UST Renewal Application (every 3 years)	Review all UST renewal applications within 30 days	85% UST renewal applications reviewed within 30 days	September 30, 2022	DSD
UST Facility Inspections	Inspect 90% UST facilities annually.	100% Inspections conducted	September 30, 2022	DSD
New UST Construction Inspections	Inspect 90% New UST installations annually.	100% new UST inspections conducted	September 30, 2022	DSD

Summary of enforcement actions

429 Notices of Violation issued

0 Citations issued

0 Enforcement actions over the BSRZ

1 Referrals to TCEQ

The New England Interstate Water Pollution Control Commission (NEIWPCC) gathered for the National Tanks Conference in Pittsburg, PA in September. The event brings together hundreds of underground storage tank (UST) / Leaking Petroleum Storage Tank (LPST) professionals, including tank inspectors, cleanup specialists, state, tribal, and territorial employees, federal regulators, and industry representatives. A Division Manager, Environmental Supervisor, and Sr. Inspection Specialist attended the conference for DSD. While there, they networked with industry professionals to learn about emerging issues, policy changes, new equipment, and UST site case studies. Staff shared valuable information learned to ensure the continuation of providing excellent, knowledgeable service to customers.

Austin Fire Department

Status of Implementation and Compliance

Aboveground Hazardous Materials Permit Program

AFD is responsible for the inspection and permitting (three-year permit term) of facilities that store or handle hazardous materials. During inspections, AFD reviews the facility's hazardous material storage, handling, and disposal practices and enforces City and International Fire Code (IFC) requirements.

AFD Aboveground Hazardous Materials Permit Program Inventory for FY22

3367 Permitted Locations

630 Tier II Permitted Sites

During the reporting period, the following activities were accomplished:

 MCM 5 Industrial and High-Risk Runoff FY22 <i>Stormwater Inspection Program</i>				
Activity/BMP	Quantifiable Target	Achievement	Completion	Department
Inspections of locations with Hazardous Materials Permits	Inspect 300 locations	437 inspections conducted	September 30, 2022	AFD
Investigation of complaints at locations without and with Hazardous Material Permits.	Investigate 100% of all complaints	8 complaint investigations conducted 8 complaints received	Immediately to within five business days of the report, based on the severity reported by the complainant.	AFD

Summary of enforcement actions

746 Notices of Violation issued

0 Citations issued

ii. Industrial and High-Risk Inspection Program

The City of Austin does not conduct industrial and high-risk monitoring at facilities and instead conducts inspections at permitted facilities maintaining either an NOI or NEC. Inspections will be conducted once per permit term to verify compliance with TXR050000. Please refer to the section above *Priorities and Procedures for Inspections and Implementing Control Measures* for further information on the industrial inspection program.

No changes to the SWMP related to MCM5 programs are being proposed at this time.

f. MCM 6: Construction Site Stormwater Runoff

i. Requirements for Structural and Non-Structural BMPs

Status of Implementation and Compliance

Development Services Department (DSD) staff continued the site plan review program functions within the City's planning jurisdiction (see MCM2). DSD environmental inspection staff inspects permitted site development plans, subdivision, and utility construction projects within the City full purpose areas and the ETJ for compliance with water quality regulations. Inspectors review compliance with water quality zones, impervious cover limitations, erosion and sedimentation controls, site disturbance areas, permanent final stabilization, cut and fill, water quality controls, spoil disposal, storm sewer discharges, wastewater restrictions, and roadway requirements.

ii. Inspection of Construction Sites and Enforcement Requirements

Status of Implementation and Compliance

DSD staff is responsible for inspecting construction projects to ensure compliance with plans approved by the City based on code and criteria manual requirements. There are several "called" inspections during construction that the contractor schedules with DSD. These may include pre-construction, pre-pour, interim tree, and final inspections. Routine commercial and residential inspections are also conducted during active construction.

DSD Construction Inspection Inventory during FY22

1359 active commercial sites

893 active residential sites

During the reporting period, the following activities were accomplished:

 MCM 6 - Construction Site Stormwater Runoff FY22				
Activity/BMP	Quantifiable Target	Achievements	Completion	Department
Routine Inspections	Monthly inspections of 80% active commercial sites	99% commercial site inspections conducted (15993)	September 30 th , 2022	DSD
Routine Inspections	Monthly inspections of 80% active residential sites	71% residential site inspections conducted (10679)	September 30 th , 2022	DSD
Complaints	Respond within 24 hours (or next business day) to 90% complaints	1062 complaint inspections	September 30 th , 2022	DSD
Pre-construction Meeting	Conduct pre-construction meeting within 3 business days of request	100% pre-construction meetings held in 3 business days	September 30 th , 2022	DSD

Summary of enforcement actions

234 Stop Work Orders issued

2 Misdemeanor Citations issued

358 Misdemeanor Affidavits filed to Municipal court for Environmental and Sound Enforcement

373 Referrals to other enforcement agencies

Trending national staffing shortages have affected DSD. DSD had to hire staff that require more training. Environmental complaints and monthly inspections have increased significantly (complaints up 114% from FY21) which has affected the inspection of active residential sites. Staff development has improved from previous years and commercial monthly inspections performance has increased.

iii. Education and Training for Construction Site Operators

Status of Implementation and Compliance

The City continues to provide educational information related to storm water management techniques such as erosion and sedimentation controls, construction sequencing, permanent water quality controls, and site restoration activities.

DSD continues to regularly meet with the Home Builders Association and the Infill Coalition Association. DSD also meets in-person with contractors when they call for assistance.

Monthly meetings with WPD, Arborist, Water Quality Review, Environmental Review and SSI were established and continue to occur. Presentations were provided to stakeholders and the community providing further engagement and educational opportunities..

The City hosts Austin Environmental Inspections Lunch and Learn on a bi-monthly basis for all citizens and stakeholders. The sessions include interactive presentations related to erosion and sedimentation controls, construction site stabilization, water quality resources, tree protection, and environmental enforcement.

iv. Notification of Requirements to Construction Site Operators

Status of Implementation and Compliance

A Pre-Construction meeting is conducted with the owner's representative, engineer, contractor, and relevant inspection staff. All parties review and discuss details and requirements of construction phase activities. DSD staff reviews the approved erosion and sediment control plan and confirms the placement of all approved temporary and permanent Best Management Practices (BMPs) which include erosion controls, water quality structures, drainage features, and permanent stabilization.

During the reporting period, DSD continued to conduct Pre-Con meetings with developers and construction site operators and provided a Pre-Con handout (see following page) during the one-on-one pre-construction meeting. On May 5, 2022, the MS4 Coordinator attended a DSD pre-con and WPD retention irrigation pre-con at the new H-E-B project on Nutty Brown Road. DSD met with site owners, contractors, engineers, and consultants and verbally reviewed the requirements on the Pre-Con checklist. TCEQ Construction General Permit and City permit statuses were verified at the beginning of the meeting. The thorough pre-con review covered SWP3 requirements, postings, inspection frequency, etc. WPD covered expectations and reviewed the plan sheets with engineers and contractors.

No changes to the SWMP related to MCM6 programs are being proposed at this time.

Pre-Construction Meeting Handout (Commercial Sites & Subdivisions)

Date: _____

Site Name: _____

Site Address: _____

Permit Number: _____

TPDES: TXR _____

Environmental Inspector: _____

Acknowledgement that Pre-Construction Handout was reviewed by a City of Austin Environmental Inspector:

Date: _____

Superintendent Name: _____

Superintendent Signature: _____

City of Austin Pre-Construction Checklist

ENVIRONMENTAL INSPECTIONS COMMERCIAL SITES & SUBDIVISIONS

Pre-Construction Meeting Requirements

- All permits must be approved, released and signed by Land Use Review
- Acquire a Barton Springs Zone (BSZ) operating permit, if required
- All applicable permits and notices must be posted at site entrance or location visible to the public
- Copy of approved plans on site
- Appropriate phase of temporary Erosion and Sedimentation Controls (ESC) must be installed per plans
- Tree protection must be installed per plans prior to clearing and grading activities
 - Changes to Tree Protection Plan must be approved by the Development Assistance Center (DAC)
 - Where trees are to be fertilized prior to construction activity, documentation is required prior to the pre-construction meeting

The City of Austin encourages the preservation of trees and under-story plants that are not specifically designated for preservation on approved plans

Storm Water Pollution Prevention Plan (SWP3) Requirements

- SWP3 shall be accessible on site, or a posted Construction Site Notice (CSN) must describe the location of the SWP3 if off site
- SWP3 must be made readily available upon request, or no later than within 24 hours if stored off site
- An owner representative is required to inspect controls daily and log entries
 - Every 14 days, and within 24 hours after a ½" or greater rainfall event
 - OR**
 - Once weekly regardless of a rainfall occurrence
- Owner representative can be a Licensed Engineer, a person supervised by a Licensed Engineer, a Certified Inspector, or an Inspector in Training (IT)
- Update site map and other SWP3 information as site conditions change
- Provide electronic copies of SWP3 reports immediately upon the request of the Environmental Inspector
- Environmental Inspector will perform SWP3 audits biannually or as deemed necessary

Temporary Erosion and Sediment Controls (ESC) and other BMPs

- ESCs shall be phased for effectiveness and maintained throughout the life of the permit
- Minor adjustments can be made to the ESC plan without a site plan correction/ revision at the discretion of the Environmental Inspector
- Environmental Inspector shall request the installation of additional controls, if deemed necessary
- Rough cut ponds shall serve as temporary sediment traps- constructed as the first item in the Sequence of Construction
- Install and maintain Construction Site Entrance to prevent tracking- if tracking occurs off site take corrective action immediately
- Any off site discharge of water must comply with City Code (contact Environmental Inspector prior to de-watering activities)
 - Settling tanks, filter bags, or pits recommended
 - A de-watering plan may be required
- Install lined concrete wash-out area- properly dispose of materials once solidified
- Perform dust control measures as needed
- Maintain good housekeeping at all times and keep trash and debris contained
- Keep oil, hazardous material, and other liquids labeled, covered, and stored on secondary containment
- Store port-o-johns on level ground, outside of drainage pathways, ROW, and Critical Root Zones
- Initiate temporary/ permanent stabilization when construction ceases in disturbed area for more than 14 days

Construction Activity Requirements

- Construction activity must follow the Sequence of Construction in approved site plan
- Limits of Construction (LOC), haul roads, staging & other designated areas must follow approved plans
- Construction adjacent to creeks shall comply with requirements for construction in waterways
- Coordinate with other departments for approval to construct within drainage easements, floodplain, setbacks, ROW, etc.
- Development must be consistent with approved plans- any changes, additions, and/ or deletions will require all site plan corrections/ revisions to show as-built conditions
- Any spoil/ fill material disposed off-site within the city limits out to 5-mile Extra Territorial Jurisdiction (ETJ) of Austin must be disposed of at a permitted site
 - Notify Environmental Inspector prior to disposal
 - Retain copy of disposal site permit and receipt
- All on-site temporary and permanent fill areas must comply with the location, depth, and limits on approved site plan
- All Water Quality Facilities must be constructed per approved site plan
 - Environmental Inspector shall be notified to conduct benchmark inspections, or contractor shall uncover and allow viewing of all components not seen during construction (upon request)
 - Water Quality facilities must be complete, functional, and revegetated prior to final inspection
- Spills less than 5 gallons is the site operator's responsibility
 - Contact City of Austin Spill Response (and TCEQ if applicable) for spills that are 5 gallons or more

Project Acceptance

- All site plan corrections/ revisions must be approved
- Submit an approved Engineer's Concurrence Letter (ECL)
- Final inspection conducted by Environmental Inspector within approximately 48 hours of approved ECL submittal
- Final inspection punch list items complete
- Water Quality structures complete and fully functional
- Temporary Certificate of Occupancy (TCO) may be issued prior to final stabilization, with the approval of the Environmental Inspector
- Certificate of Occupancy (CO) or Certificate of Compliance (CC) shall be issued once final stabilization requirements are satisfied, or a Developer's Contract is in place
- Final Stabilization requirements satisfied
 - 95% revegetation, 1 ½ " tall grass, per approved permanent seed mix/ sod on site plan
- AND/ OR**
 - Landscape requirements met according to approved site plan
 - Provide Landscape Concurrence Letter
 - Utilization of appropriate top soil
 - No bare areas exceeding 10 SF
 - Cool season and annual grasses will not be accepted as permanent revegetation
 - Temporary ESC and accumulated sediment must be removed from site
- Developer's Contract in place if final stabilization not complete at end of project
 - Developer's contract issued for a 4 month period
 - If executed between Sep. 15th and Dec. 15th and requiring Bermuda grass, developer/ owner can request 1, 4 month extension
 - If executed for a project requiring native grasses, developer/ owner can request 1, 8 month extension
- Fiscal Release (ESC fiscal will not be released until final permanent stabilization requirements have been satisfied)

Violations and Enforcement Procedures

- Violations will be handled as followed
 - Verbal warning
 - Written warning with re-inspection fee
 - Stop Work Order (SWO) with re-inspection fee (officially initiating the enforcement process)
 - Citation and criminal penalties up to \$2000 per day per violation
 - SWO and/ or Citation may result in all associated permits being placed on hold allowing no further work or inspections until issues are resolved

Environmental Inspector can bypass or duplicate any of these steps at their discretion, depending on the severity of the violation

Priority violations may result in an immediate Stop Work Order (SWO) or issuance of a citation

- A re-inspection fee will be issued if the Environmental Inspector has to make repeat site visits for:
 - Pre-construction Meetings
 - Non-permitted Sites
 - Release of a Violation or Stop Work Order (SWO)
 - Release of an Ordinance Violation
 - Inspection of Water Quality Facility
 - Final Inspection
 - Complying with terms of Developer's Contract
- Examples of Routine Violations
 - Failure to perform maintenance and/ or repair temporary ESC after disturbance or rainfall event, or as directed by the Environmental Inspector
 - Failure to make plan revisions to temporary ESC as directed by Environmental Inspector
 - Tracking of soil, base materials, gravel, or paving materials onto roadway
 - Failure to maintain tree protection
 - Failure to maintain good housekeeping
- Examples of Priority Violations
 - No permit for development or other related construction activities
 - Failure to have pre-construction meeting
 - Failure to follow Sequence of Construction
 - Any disturbance outside Limits of Construction
 - Clearing, grading, or filling beyond what is delineated on approved site plan resulting in damage to trees, natural areas, Critical Environmental Features (CEFs), or immediate water quality degradation
 - Occupancy of a building, parking lot, or proposed improvements prior to final inspection and release from Environmental Inspector
 - Removal of protected trees without a permit
 - Offsite discharge of silt or other pollutants, particularly in the Barton Springs Zone (BSZ)
 - Failure to comply with a Stop Work Order (SWO)

ATTACHMENT 2

TCEQ Fact Sheet

Texas Commission on Environmental Quality (TCEQ)
Construction General Permit No. TXR150000

What Activities Need TCEQ Construction General Permit (CGP) Coverage?

You need permit coverage if:

- Your construction activities will disturb one or more acres, **or**
- Less than one acre is disturbed, but your site is part of a larger common plan of development or sale with the potential to cumulatively disturb one or more acres.

Who's Responsible for Getting Permit Coverage?

Title to the property does *not* determine permitting obligations.

It is the **operator** that is responsible for obtaining permit coverage. The operator is the party or parties that either individually or taken together meet the following two criteria:

- They have operational control over the site specifications (including the ability to make specification modifications);
- They have day-to-day operational control of those activities at the site necessary to ensure compliance with plan requirements and permit conditions (e.g. are authorized to carry out activities identified in the plan).

At a typical commercial construction site, the owner will meet the first criteria of an "operator" and the general contractor(s) will meet the second criteria. If so, both the owner and the general contractor(s) must obtain permit coverage.

At a residential development, a developer may construct roads and install utilities, while builders do construction on individual lots. The developer and the builder will both meet the criteria of an "operator" and must obtain permit coverage.

A builder who controls his own plans and specifications, disturbs less than 1 acres but is part of a larger common plan of development of sale (e.g. a subdivision), must still obtain permit coverage.

What Will You Need To Do?

Large Construction Sites

If you operate a construction project that will disturb 5 or more acres you must:

- Obtain a copy of the TCEQ CGP (TPDES Permit no. TXR150000),
- Develop and implement a Storm Water Pollution Prevention Plan (SWP3) covering the entire site or all portions of the site for which you are the operator,
- Complete and submit a Notice of Intent (NOI) to TCEQ and forward a copy of the NOI to the City of Austin (the local MS4) prior to the commencement of construction, and
- Post copy of the CSN at the work site, or a construction sign that includes your permit number, a contact name and phone number, a project description and the location of the SWP3.

FACT SHEET-0603Rev2014

Small Construction Sites

If you operate a construction project that will disturb 1 or more acres, but less than 5 acres, you must:

- Obtain a copy of the TCEQ CGP (TPDES Permit no. TXR150000),
- Develop and implement a Storm Water Pollution Prevention Plan (SWP3) covering the entire site or all portions of the site for which you are the operator,
- Complete and post a construction site notice,
- Forward a copy of the construction site notice to the City of Austin (the local MS4) prior to the commencement of construction.

Unless notified to the contrary, operators are authorized to discharge storm water from construction activities under the terms and conditions of the permit, (7 days) after the date that the NOI is postmarked or if utilizing electronic submittal, prior to commencing construction activities.

Note: *Construction projects that disturb less than 1 acre, but are part of a common plan development that will disturb 5 or more acres, must follow the guidance for **large construction sites**. If the construction project is part of a common plan of development will disturb 1 or more acres, but less than 5 acres, the guidance for **small construction sites** must be followed.*

Note: *Erosion and Sedimentation Control Plans required by the City of Austin **are not substitutes** for the TCEQ required Storm Water Pollution Prevention Plans (SWP3).*

Where do you submit your information?

The completed NOI must be mailed to the following address:

Texas Commission on Environmental Quality (TCEQ)

Wastewater Permitting Section

Storm Water & Pretreatment Team; MC - 228

P.O. Box 13087

Austin, Texas 78711-3087

An application fee of \$325 or \$225-Electronic, must be submitted with each NOI and the application fee should be submitted separately to one of the following addresses:

By Regular U.S. Mail:

Texas Commission on Environmental Quality (TCEQ)

Financial Administration Division

Revenue Section MC-214

P.O. Box 13087

Austin, TX 78711-3087

By Electronic Steers:

Texas Commission on Environmental Quality (TCEQ)

www.tceq.state.tx.us/steers

Steers Participation Agreement Form

A copy of the NOI and the Construction Site Notice must be mailed to the City of Austin at the following address:

Lee C. Lawson

City of Austin - WPD/FOD

P.O. Box 1088

Austin, Texas 78767

How Can You Get More Information?

Information, forms and documents are available through the TCEQ storm water web site at www.tceq.state.tx.us.

Additional guidance can also be obtained by calling Lee C. Lawson at 974-3348.

Note: *The City of Austin has provided this information for **educational purposes only**. The City of Austin does not enforce the TCEQ Construction General Permit requirements.*

Pre-Construction Meeting Handout (Residential Sites)

Date: _____

Site Name: _____

Site Address: _____

Permit Number: _____

TPDES: TXR _____

Environmental Inspector: _____

Acknowledgement that Pre-Construction Handout was reviewed by a City of Austin Environmental Inspector:

Date: _____

Superintendent Name: _____

Superintendent Signature: _____

City of Austin Pre-Construction Checklist

ENVIRONMENTAL INSPECTIONS RESIDENTIAL SITES

Pre-Construction Meeting Requirements

- All permits must be approved, released and signed by Residential Plan Review
- Site plan exemption must be approved for any cut/ fill or retaining walls over 4', or permit issued by the Development Assistance Center (DAC) (if applicable)
- All applicable permits and notices posted at site entrance or location visible to the public
 - Sites with disturbance over 1 acre are subject to Texas Commission on Environmental Quality (TCEQ) rules and regulations
- Erosion and Sedimentation Controls (ESC) must be installed prior to clearing and grading activities
- Tree protection must be installed prior to clearing and grading activities
- All controls must be inspected and approved before any construction activities can commence, including forming for layout

The City of Austin encourages the preservation of trees and under-story plants that are not specifically designated for preservation on approved plans

Storm Water Pollution Prevention Plan (SWP3) Requirements (for disturbance over 1 acre)

- SWP3 shall be accessible on site, or a posted Construction Site Notice (CSN) must describe the location of the SWP3 if off site
- SWP3 must be made readily available upon request, or no later than within 24 hours if stored off site
- An owner representative is required to inspect controls daily and log entries
 - Every 14 days, and within 24 hours after a ½" or greater rainfall event
- OR**
- Once weekly regardless of a rainfall occurrence
- Owner representative can be a Licensed Engineer, a person supervised by a Licensed Engineer, a Certified Inspector, or an Inspector in Training (IT)
- Update site map and other SWP3 information as site conditions change
- Provide electronic copies of SWP3 reports immediately upon the request of the Environmental Inspector
- Environmental Inspector will perform SWP3 audits biannually or as deemed necessary

Temporary Erosion and Sediment Controls (ESC) and other BMPs

- Environmental Inspector shall request minor adjustments to the ESC, or the installation of additional controls, if deemed necessary
- ESC must be maintained throughout the life of the permit
- Site entrance shall be stabilized, and/ or controls must be in place to prevent tracking- if tracking occurs off site take corrective action immediately
- Any off site discharge of water must comply with City Code (contact Environmental Inspector prior to de-watering activities)
 - Settling tanks, filter bags, or pits recommended
 - A de-watering plan may be required
- Install lined concrete wash-out area- properly dispose of materials once solidified
- Perform dust control measures as needed
- Maintain good housekeeping at all times and keep trash and debris contained
- Keep oil, hazardous material, and other liquids labeled, covered, and stored on secondary containment
- Store port-o-johns on level ground, outside of drainage pathways, ROW, and Critical Root Zones
 - No encroachment on ESC
- Initiate temporary/ permanent stabilization when construction ceases in disturbed area for more than 14 days

Construction Activity Requirements

- Access and construction activities must stay within permitted plan set and/ or property boundaries
- Construction adjacent to creeks shall comply with requirements for construction in waterways
- Coordinate with other departments for approval to construct within drainage easements, floodplain, setbacks, ROW, etc.
- Material stockpiles must be outside of drainage pathways, ROW, and Critical Root Zones
 - No encroachment on ESC
- Any spoil/ fill material disposed off-site within the city limits out to 5-mile Extra Territorial Jurisdiction (ETJ) of Austin must be disposed of at a permitted site
- All on-site temporary and permanent fill areas must comply with permit terms
- All Water Quality Facilities must be constructed per approved plans, if applicable
- Spills less than 5 gallons is the site operator's responsibility
 - Contact City of Austin Spill Response (and TCEQ if applicable) for spills that are 5 gallons or more

Permit Close-Out

- Fees paid/ violations lifted
- Site and surrounding areas free of sediment
- Trash/ construction debris contained
- Water Quality structures complete and fully functional (if applicable)
- ESCs in place until permanent vegetation has been established
- Temporary Certificate of Occupancy (TCO) may be issued prior to final stabilization
 - Contact Environmental Inspector to clear 600 environmental inspection
- Final Stabilization requirements satisfied
 - 95% revegetation
 - Utilization of appropriate top soil
 - No bare areas exceeding 10 SF
 - Cool season and annual grasses will not be accepted as permanent revegetation
 - Temporary ESC and accumulated sediment must be removed from site
- Contact Environmental Inspector for final 602 environmental inspection
- Issuance of Certificate of Occupancy (CO)

Violations and Enforcement Procedures

- Violations will be handled as followed
 - Verbal warning
 - Written warning with re-inspection fee
 - Stop Work Order (SWO) with re-inspection fee (officially initiating the enforcement process)
 - Citation and criminal penalties up to \$2000 per day per violation
 - SWO and/ or Citation may result in all associated permits being placed on hold allowing no further work or inspections until issues are resolved

Environmental Inspector can bypass or duplicate any of these steps at their discretion, depending on the severity of the violation

Priority violations may result in an immediate Stop Work Order (SWO) or issuance of a citation

- A re-inspection fee will be issued if the Environmental Inspector has to make repeat site visits for:
 - Pre-construction Meetings
 - Non-permitted Sites
 - Release of a Violation or Stop Work Order (SWO)
 - Release of an Ordinance Violation
 - Inspection of Water Quality Facility
 - Final Inspection

- Examples of Routine Violations
 - Failure to perform maintenance and/ or repair temporary ESC after disturbance or rainfall event, or as directed by the Environmental Inspector
 - Tracking of soil, base materials, gravel, or paving materials onto roadway
 - Failure to maintain tree protection
 - Failure to maintain good housekeeping

- Examples of Priority Violations
 - No permit for construction activities
 - Failure to have pre-construction meeting
 - Any disturbance outside property boundaries
 - Clearing, grading, or filling resulting in damage to trees, natural areas, Critical Environmental Features (CEFs), or immediate water quality degradation
 - Occupancy of a building, parking lot, or proposed improvements prior to final inspection and release from Environmental Inspector
 - Removal of protected trees without a permit
 - Offsite discharge of silt or other pollutants, particularly in the Barton Springs Zone (BSZ)
 - Failure to comply with a Stop Work Order (SWO)

TCEQ Fact Sheet

Texas Commission on Environmental Quality (TCEQ)
Construction General Permit No. TXR150000

What Activities Need TCEQ Construction General Permit (CGP) Coverage?

You need permit coverage if:

- Your construction activities will disturb one or more acres, **or**
- Less than one acre is disturbed, but your site is part of a larger common plan of development or sale with the potential to cumulatively disturb one or more acres.

Who's Responsible for Getting Permit Coverage?

Title to the property does *not* determine permitting obligations.

It is the **operator** that is responsible for obtaining permit coverage. The operator is the party or parties that either individually or taken together meet the following two criteria:

- They have operational control over the site specifications (including the ability to make specification modifications);
- They have day-to-day operational control of those activities at the site necessary to ensure compliance with plan requirements and permit conditions (e.g. are authorized to carry out activities identified in the plan).

At a typical commercial construction site, the owner will meet the first criteria of an "operator" and the general contractor(s) will meet the second criteria. If so, both the owner and the general contractor(s) must obtain permit coverage.

At a residential development, a developer may construct roads and install utilities, while builders do construction on individual lots. The developer and the builder will both meet the criteria of an "operator" and must obtain permit coverage.

A builder who controls his own plans and specifications, disturbs less than 1 acres but is part of a larger common plan of development of sale (e.g. a subdivision), must still obtain permit coverage.

What Will You Need To Do?

Large Construction Sites

If you operate a construction project that will disturb 5 or more acres you must:

- Obtain a copy of the TCEQ CGP (TPDES Permit no. TXR150000),
- Develop and implement a Storm Water Pollution Prevention Plan (SWP3) covering the entire site or all portions of the site for which you are the operator,
- Complete and submit a Notice of Intent (NOI) to TCEQ and forward a copy of the NOI to the City of Austin (the local MS4) prior to the commencement of construction, and
- Post copy of the CSN at the work site, or a construction sign that includes your permit number, a contact name and phone number, a project description and the location of the SWP3.

FACT SHEET-0603Rev2014

Small Construction Sites

If you operate a construction project that will disturb 1 or more acres, but less than 5 acres, you must:

- Obtain a copy of the TCEQ CGP (TPDES Permit no. TXR150000),
- Develop and implement a Storm Water Pollution Prevention Plan (SWP3) covering the entire site or all portions of the site for which you are the operator,
- Complete and post a construction site notice,
- Forward a copy of the construction site notice to the City of Austin (the local MS4) prior to the commencement of construction.

Unless notified to the contrary, operators are authorized to discharge storm water from construction activities under the terms and conditions of the permit, (7 days) after the date that the NOI is postmarked or if utilizing electronic submittal, prior to commencing construction activities.

Note: *Construction projects that disturb less than 1 acre, but are part of a common plan development that will disturb 5 or more acres, must follow the guidance for **large construction sites**. If the construction project is part of a common plan of development will disturb 1 or more acres, but less than 5 acres, the guidance for **small construction sites** must be followed.*

Note: *Erosion and Sedimentation Control Plans required by the City of Austin **are not substitutes** for the TCEQ required Storm Water Pollution Prevention Plans (SWP3).*

Where do you submit your information?

The completed NOI must be mailed to the following address:

Texas Commission on Environmental Quality (TCEQ)

Wastewater Permitting Section

Storm Water & Pretreatment Team; MC - 228

P.O. Box 13087

Austin, Texas 78711-3087

An application fee of \$325 or \$225-Electronic, must be submitted with each NOI and the application fee should be submitted separately to one of the following addresses:

By Regular U.S. Mail:

Texas Commission on Environmental Quality (TCEQ)

Financial Administration Division

Revenue Section MC-214

P.O. Box 13087

Austin, TX 78711-3087

By Electronic Steers:

Texas Commission on Environmental Quality (TCEQ)

www.tceq.state.tx.us/steers

Steers Participation Agreement Form

A copy of the NOI and the Construction Site Notice must be mailed to the City of Austin at the following address:

Lee C. Lawson

City of Austin - WPD/FOD

P.O. Box 1088

Austin, Texas 78767

How Can You Get More Information?

Information, forms and documents are available through the TCEQ storm water web site at www.tceq.state.tx.us.

Additional guidance can also be obtained by calling Lee C. Lawson at 974-3348.

Note: *The City of Austin has provided this information for **educational purposes only**. The City of Austin does not enforce the TCEQ Construction General Permit requirements.*

g. MCM 7: Public Education and Outreach/Public Involvement and Participation

i. Public Education and Outreach

The public education and awareness efforts of the City of Austin encompass a wide variety of water quality-related programs. Watershed Protection, Austin Resource Recovery, and Austin Water each have programs that provide water quality and pollution prevention education to citizens in the Austin area.

Austin Water (AW)

Status of Implementation and Compliance

AW's customer outreach programs are geared at protecting the City's sanitary sewer system by promoting the proper disposal of commercial and residential fats, oil and grease (FOG) and appropriate discarding of items that are frequently flushed down the toilet but should not be, like disposable wipes and unused pharmaceuticals.

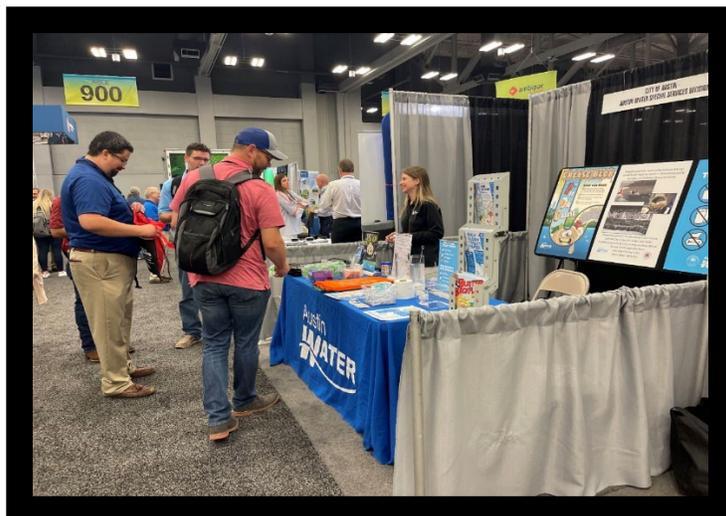

During the reporting period, the following activities were accomplished:

 MCM 7 Public Education and Outreach FY22				
Activity/BMP	Quantifiable Target	Achievement	Completion	Department
Public Outreach- Stop the Blob!	4 outreach events/year	8 outreach events conducted	September 30, 2022	AW
Social Media Campaign-Stop the Blob!	Quarterly post on AW social media	At least one (1) social media posts quarterly 14 total social media posts	September 30, 2022	AW

During FY22, Austin Water continued to educate customers about proper disposal of FOG and the dangers of flushing items other than toilet paper using various outreach materials. Handouts and complimentary items to help properly dispose of FOG (collapsible funnels, can lids, pan scrapers, etc.) are provided at outreach events and included in outreach giveaways offered to apartment complexes following a SSO. All related handouts are located on the Austin Water website. Copies of all outreach materials are available upon request.

FOG focused outreach events during the reporting period:

Date	Event	Location	Visitors
11/14/2021	21st Annual Mighty Texas Dog Walk	Camp Mabry	400+
3/30/2022	City of Austin Health & Lifestyle Expo	Palmer Events Center	450
4/3/2022	ABC Kite Fest	Zilker Park	500+
4/6-7/2022	Texas Water Conference	Henry B. Gonzalez Convention Center (San Antonio)	450
5/10-11/2022	TCEQ Trade Fair and Conference	Austin Convention Center	275
5/21/2022	Community Connections Resource Fair	Lyndon B. Johnson HS	125
6/18/2022	Soul Food Truck Festival	Huston-Tillotson University	125
8/12-14/2022	Austin Fall Home & Garden Show	Austin Convention Center	275

The AW Stop the Grease Blob webpage was updated several times in FY22, including reformatting for easier viewing, adding “Holiday FOG Tips” information, adding a photo gallery of pictures from community events and adding a “Community Outreach Events” calendar. As noted above, the Austin Water Stop the Grease Blob webpage includes links to the various FOG related outreach materials such as the residential Grease Blob handout and the one-page flyer on proper grease disposal for multi-family property managers to print for their residents.

Print, digital and radio advertisements related to the Austin Water FOG outreach program ran on several platforms during October and November 2021. The print advertisements were in the Community Impact paper, digital ads were on Community Impact, Audacy Inc., KUT, Sun Radio and Waterloo Media and radio spots were on KUT, Sun Radio, and Waterloo Media. In addition, in November 2021, Austin Water assisted the local CBS News with a piece on proper FOG disposal in time for holiday meal preparation (<https://cbsaustin.com/news/local/why-you-should-never-dump-turkey-grease-down-the-drain>).

Related to social media, the Austin Water Facebook, Twitter and Instagram accounts all saw an increase in followers during FY22. In FY22, there were 14 “Stop the Grease Blob” (including at least one post during each quarter of the FY) and 6 “Only Flush Toilet Paper” related posts on the social media platforms.

Watershed Protection Department (WPD)

Status of Implementation and Compliance

The public education and awareness efforts of WPD encompass a wide variety of elements to encourage and assist citizens to help protect water quality in the full purpose jurisdiction. WPD coordinates a multitude of programs to accomplish outreach and education. Some of these program goals include educating students within the Austin Independent School District, providing responsible gardening information and tips to residents and landscape professionals, providing information and tools to pet owners, and providing oil-change buckets to home mechanics.

During the reporting period, the following activities were accomplished:

 MCM 7 Public Education and Outreach FY22				
Activity/BMP	Quantifiable Target	Achievement	Completion	Department
Elementary School: Earth Camp and Earth School	Offer Earth Camp or Earth School to 100% of AISD Elementary Schools each school year	Earth Camp or Earth School offered to 100% of AISD Elementary Schools	September 30, 2022	WPD
Storm Drain Marking	Support at least one storm drain marking event each quarter	45 storm drain marking events supported	September 30, 2022	WPD
Grow Green	Promote the website 4 times annually	8 promotions of the website	September 30, 2022	WPD
Scoop the Poop	Fulfill 100% of requests from the Parks and Recreation Department (PARD) for pet waste bags and dispensers	3,672,000 pet waste bags provided to PARD 123 pet waste bag dispensers provided to PARD	September 30, 2022	WPD
Scoop the Poop	Mail information to 25 pet-friendly business and 25 pet-friendly apartments	169 mailouts to pet-friendly businesses and 75 mailouts to pet-friendly apartments	September 30, 2022	WPD
East Austin Environmental Initiative	Participate in at least 2 community events each year	Participated in 4 community events	September 30, 2022	WPD
Shade Tree Mechanic	Provide educational information and free oil-change bucket to 100% of citizen requests	13 oil-change buckets provided to citizens	September 30, 2022	WPD
Pollution Hotline	5,000 online advertising interactions (community member <u>clicks</u> on web advertisement)	5,994 online advertising interactions	September 30 th , 2022	WPD
	Quarterly post on WPD social media	4 posts on WPD social media advertising the hotline	September 30 th , 2022	WPD

Additional details and accomplishments of the program

- Displayed prominent interpretive signage about the endangered Barton Springs and Austin Blind salamanders, hydrology of the Edwards Aquifer, the history of the springs, and the importance of stewardship at the main entries to Barton Springs Pool.
- Displayed signs (English/Spanish) at Eliza Spring, Sunken Gardens and Upper Barton Springs to raise awareness about endangered salamanders and restricted activities.
- Continued to provide materials such as an audio tour of Barton Springs Pool that citizens can stream on their phones, the “Who’s swimming with you?” brochure in both English and Spanish, and Barton Springs salamander masks.
- Provided Grow Green landscaping education that includes a focus on reducing the use of landscaping chemicals by using integrated pest management techniques.
- Continued support for the Splash! groundwater education exhibit near Barton Springs.
- The Pollution Hotline was advertised on CapMetro bus wraps.

8 Week Campaign:

(17) Bus Queens = 1,851,844 (estimated views)

(50) Paid Interiors = 238,000

(50) SAB Interiors = 238,000

CapMetro

Investment: \$15,500

Austin Resource Recovery (ARR)

Status of Implementation and Compliance

ARR implements education programs aimed to reduce the generation of litter and promote proper disposal of household hazardous waste. ARR advertises via social media, ARR's website, utility bill inserts, newspaper ads, etc. Programs encourage proper disposal of waste, recycling, and "smart" trash habits.

During the reporting period, the following activities were accomplished:

 MCM 7 Public Education and Outreach FY22				
Activity/BMP	Quantifiable Target	Achievement	Completion	Department
Storm water education specific social media posts	12 social media posts focusing on proper disposal of plastic film, HHW and how to properly collect and set out leaves and yard trimmings.	66 social media posts	September 30, 2022	ARR
Inclusions in electronic newsletter (either as a feature or side bar item)	4 mentions in newsletter about proper disposal of plastic film, HHW, and collecting and setting out leaves and yard trimmings.	5 mentions in electronic newsletters	September 30, 2022	ARR

Campaigns promoting safe battery disposal and use of plastic bags were also completed.

ii. Public Involvement and Participation

Status of Implementation and Compliance

The City used to maintain a combination of co-sponsorships and contracts for different programs with Keep Austin Beautiful (KAB) Program, a 501(c) (3) non-profit organization. In 2021, the City changed to one contract in which different organizations compete for varying components.

During the reporting period, the following activities were accomplished:

 MCM 7 Public Involvement and Participation FY22				
Activity/BMP	Quantifiable Target	Achievement	Completion	Department
Contract for projects and programs in the areas of cleanup, beautification, habitat and creek restoration, and education	Maintain 1 contract with external organizations	1 contract maintained by WPD with external organizations	September 30, 2022	WPD

Additional details and accomplishments of the program

- Creek Stewardship, part of the contract with external organizations, and executed by Keep Austin Beautiful (Adopt-A-Creek), executed 56 volunteer events mobilizing 714 volunteers engaged in creek cleanups (9,920 lb of trash removed).
- Clean Lady Bird Lake, part of the contract with external organizations, and executed by Keep Austin Beautiful, executed 12 volunteer events mobilizing 823 volunteers who removed 11,748 lb of trash from the lake.
- Clean Creek Campus, part of the contract with external organizations, and executed by Keep Austin Beautiful, engaged with 44 schools in Austin, teaching a total of 282 classes on creek health and stewardship, serving a total of 1,826 students.
- Floodplain Reforestation, part of the contract with external organizations, and executed by Tree Folks, planted 4.68 acres of City of Austin owned land with 16,297 tree seedlings of 26 different native species as well as added 500 seeds of locally collected native tree seeds. This reforestation aims to increase tree canopy diversity and health in the Blackland Prairie ecoregion floodplain.

iii. Evaluation of the effectiveness of this MCM

It is difficult to directly measure the effectiveness of education through pollution reduction rates; however, it may be evaluated through the amount of people reached. The City has a variety of educational programs to ensure that communications reach a large number and a wide variety of citizens. Education programs reach people through social media posts, email newsletters,

websites with helpful information, printed information at garden centers, and in-person events such as conventions and school programs.

Along with ARR's numerous social media posts that reached thousands of people, they also participated in an Earth Day event where staff answered questions, collected used household batteries for recycling, and gave away kitchen compost collectors. ARR also hosted other battery recycling events around the City during FY22.

WPD reached 9,000 students through youth education and partnership programs. There were 5,994 online advertising interactions related to water pollution prevention, 802 storm drains marked by community members, 5,000 attendees recorded at outreach events, and 128,976 visitors to the growgreen.org website.

Austin Water had a total of approximately 2600 visitors at their booths during the events they participated in during FY22.

No changes to the SWMP related to MCM7 programs are being proposed at this time.

h. MCM 8: Monitoring, Evaluation, and Reporting

i. Dry Weather Screening

Status of Implementation and Compliance

The Dry Weather Screening Program aims to detect the presence of illicit connections and improper discharges to the MS4. The dry weather screening process targets outfalls in areas of the City where illicit discharges are more likely to occur based on historic pollutant data, while accounting for every watershed within COA jurisdiction. Selected target outfalls covering all areas of the MS4 are screened at least once during the permit term. WPD screens target outfalls for flow during dry weather periods (June – September and no rainfall in the previous 72 hours).

During the reporting period, the following activities were accomplished:

 MCM 8 Monitoring Programs FY22 <i>Dry Weather Screening</i>				
Activity/BMP	Quantifiable Target	Achievement	Deadline	Department
Dry Weather Screening	Screen 135 outfalls	356 outfalls screened	September 30, 2022	WPD

During the reporting period there were 4 outfalls found to have >1 gallon per minute, none were found to be illicit discharges.

ii. Wet Weather Screening

Status of Implementation and Compliance

WPD implements a program that uses a visual assessment to provide a post-storm event evaluation of the storm water runoff in the Austin area waterways. Each watershed monitoring site(s) will be screened at least once during the permit term. A visual assessment of storm water flow will be completed at each monitoring site within 36 hours of a storm event. For the purposes of this monitoring program, a storm event will be defined as any event with greater than 0.10 inches of rain.

During the reporting period, the following activities were accomplished:

 MCM 8 Maintenance Activities FY22 <i>Wet Weather Screening</i>				
Activity	Quantifiable Target	Achievement	Completion	Department
Wet weather Monitoring	Conduct wet weather monitoring in 5 watersheds. If 5 monitoring events are not possible in one year due to drought or untimely rain events, monitoring events will be increased the following year.	7 wet weather monitoring events conducted	September 30, 2022	WPD

iii. Industrial and High-Risk Monitoring Program

The City of Austin does not conduct industrial and high-risk monitoring at facilities and instead conducts inspections at permitted facilities maintaining either an NOI or NEC. Inspections will be conducted once per permit term to verify compliance with TXR050000. Please refer to MCM 5 for further information on the industrial inspection program.

iv. Wet Weather Characterization Program

The City of Austin implements Option 2 of the permit, Representative Rapid Bioassessment Monitoring. Option 2 requires storm event monitoring in permit Years 1 and 4 and the implementation of an approved rapid bioassessment monitoring program. The stormwater permit was renewed in August 2018 and stormwater monitoring commenced in Year 1 of the permit, October 1, 2018-September 30, 2019. Storm event monitoring was conducted during the reporting period, Year 4 of the permit.

Representative Monitoring

The Watershed Protection Department (WPD) implements the City's Representative Monitoring Program. The principal objectives in the effort to satisfy the representative monitoring requirements for Part IV.A.2 of the permit are to characterize not only the quality and quantity of stormwater discharges, but the effect these discharges may have on aquatic environments in

the Austin area. These objectives were met through the continued implementation of a monitoring program composed of traditional chemical water quality measures and biological integrity assessments.

Streams that receive stormwater discharges from Austin's MS4 have been selected to represent the variety and intensity of development pressures on Austin's surface water resources. Storm event monitoring is conducted at sites with USGS stations and at sites selected to characterize stormwater influences and flow during storm events. A minimum of four sites are sampled in Year 1 and Year 4 of the permit period. The composite samples are analyzed for nutrients, metals, field, and physical parameters. An overview of Austin area watersheds and the representative monitoring site locations is included in Figure 1.

Stormwater Sampling Component

The stormwater monitoring component of the program consists of four monitoring sites at outfalls located within four watersheds. Information about each monitoring location has been included in Table 1.

Figure 1. City of Austin Representative Monitoring Locations

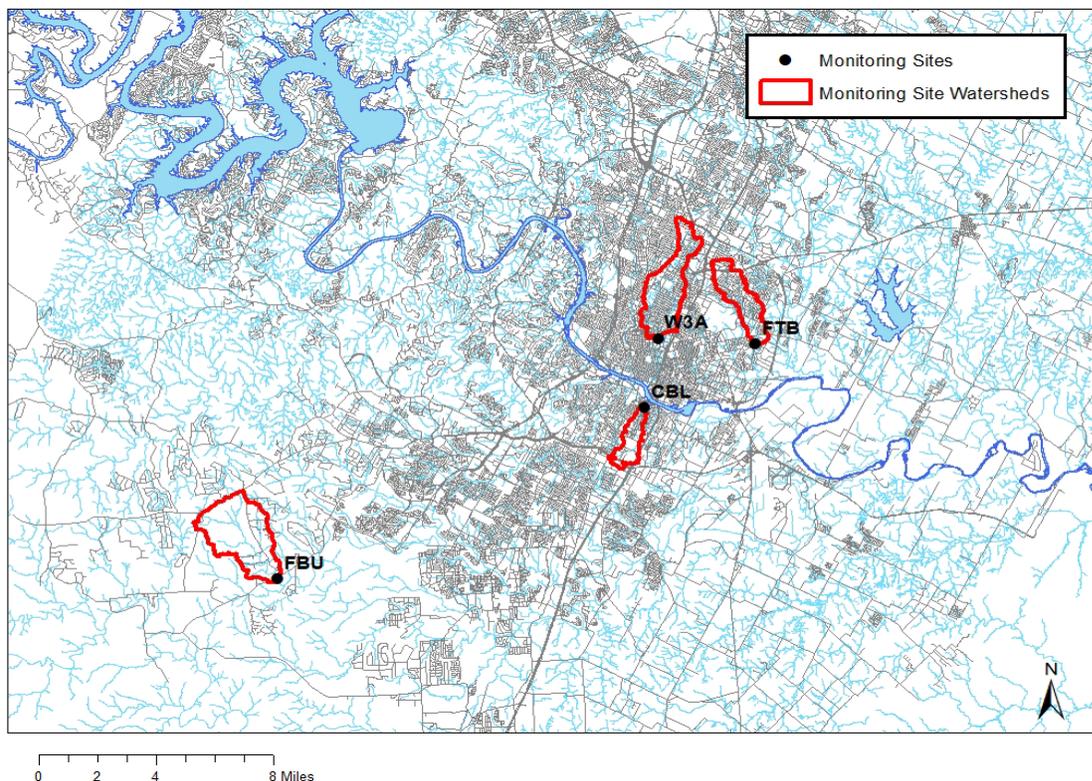

Table 1. Stormwater Monitoring Site Locations

Watershed	Site No.	Monitoring Site Location	Drainage Area (Acres)	Land Use	Receiving Water Body (Segment No.)
Bear Creek					
	001	Bear Creek @ FM 1826	3563	Undeveloped	1427
Waller Creek					
	002	Waller Creek @ 23 rd St.	2524	Mixed Urban	1429
Fort Branch Creek					
	003	Fort Branch near Webberville Road	1600	Residential (Mixed) Urban	1428
Blunn Creek					
	004	Blunn Creek near Little Stacey Park	786	Mixed Urban	1429

Sample Collection and Analysis

Stormwater monitoring consists of the collection of composite stormwater samples using automatic water quality samplers (Isco3700) and bubbler-type flow meters (generally ISCO 4200) at each outfall during storm events. The sample aliquots are collected for at least the first three hours of runoff or for the entire period of discharge if the duration is less than 3 hours. Sample aliquots are collected based on equal volumes of runoff. In addition to the composite sample, one grab sample is collected at each of the four outfalls during the first 2 hours of runoff of the same runoff event. The samples are taken to an EPA-approved water quality laboratory for analysis. Grab samples are tested for the parameters listed in Table 2. Stormwater monitoring staff record pH (S.U.) and temperature (°C) data from the grab samples prior to transporting the samples to the laboratory. All data was successfully entered into NetDMR (see Appendix F).

Table 2. Grab Sample Parameters

PARAMETER	UNITS
Oil and Grease	mg/l
E.Coli	MPN/100ml
Hardness (as CaCO ₃)	mg/l

In addition to the event mean concentration data collected from laboratory analyses, the following information is collected for each sampled storm event:

- date and duration (hours);
- rainfall measurements or estimates (inches);
- duration (hours) between the storm event sampled and the end of the previous measurable (greater than 0.1" rainfall) storm event; and
- estimate of total volume (gallons) of the discharge sampled.

Rapid Bioassessment Component

<http://austintexas.gov/departments/environmental-integrity-index>

The Environmental Integrity Index (EII) is the primary routine surface water monitoring program of the Watershed Protection Department (WPD) (COA1997) and is a critical piece of the WPD master planning process (COA 2001). WPD has implemented the EII as a tool to monitor and assess the ecological integrity and the degree of impairment of Austin's creek watersheds. In accordance with the approved rapid bioassessment monitoring program; the City of Austin performs EII studies on the following four watersheds on a semi-annual rotation: Barton Creek, Onion Creek, Walnut Creek, and Bull Creek. The WPD sampled the following Barton Springs Zone watersheds during the FY21 reporting period: Barton and Williamson creeks (See Table 5).

Sample sites within each watershed are selected for each defined sampling reach, with reaches representing contiguous areas of similar geomorphology and anthropogenic impacts. Each watershed is monitored for six index components: water quality, sediment quality, contact recreation, aesthetics, physical integrity, and aquatic life support. Water quality samples are collected quarterly, and data are collected for all other components once per sampling year.

Each of the six components are averaged by site to produce the overall EII score. The aquatic life support score integrates benthic macroinvertebrate data collected using Surber samplers and periphyton (diatoms) collected from rock scrapings.

EII scores are reported on 100-point basis and are associated with narrative score descriptions, see (Table 3).

Table 3. Narrative EII score descriptions

Narrative Score	EII Score Range	
	Lower	Upper
Excellent	89	100
Very Good	76	88
Good	64	75
Fair	51	63
Marginal	39	50
Poor	26	38
Bad	13	25
Very Bad	0	12

The EII narrative scores for all the EII watersheds sampled during the reporting period are found in Table 5. EII sampling was conducted in 23 watersheds see (Table 4). The watersheds which required EII sampling this reporting period (Bear, Little Barton, Little Bear, Onion and Slaughter Creeks) are highlighted in Table 4. Data and resulting analyses obtained from monitoring additional watersheds are included for informational purposes.

Table 4. Total EII scores by watershed for FY 21-22 EII component.

Watershed	Watershed EII Score	Water Quality	Sediment Quality	Contact Recreation	Aesthetics	Habitat	Aquatic Life	
Bull Creek	85	Very Good	74	71	87	92	91	94
Bee West	85	Very Good	64	89	90	90	86	89
Bear Creek	80	Very Good	63	78	66	88	90	94
Carson Creek	76	Very Good	56	90	58	84	78	88
Cottonmouth Creek	69	Good	52	84	52	79	76	73
Dry Creek East	66	Good	58	85	61	54	60	75
Dry Creek West	74	Good	60	69	63	88	84	83
Little Barton Creek	86	Very Good	64	87	95	94	89	88
Little Bear Creek	74	Good	64	84	58	84	78	77
Lake Creek	68	Good	63	81	61	74	76	50
Marble Creek	64	Good	50	83	46	61	72	74
North Fork Dry Creek	61	Fair	55	84	65	54	47	60
Onion Creek	84	Very Good	69	88	71	90	89	94
Rattan Creek	48	Marginal	62	0	64	60	56	0
Rinard Creek	76	Very Good	64	84	78	80	70	80
South Boggy Creek	66	Good	59	75	38	77	69	79
South Fork Dry Creek	67	Good	62	86	78	56	54	65
Slaughter Creek	75	Good	65	77	66	82	84	78
Taylor Slough North	74	Good	69	62	62	93	82	76
Taylor Slough South	60	Fair	44	74	25	93	70	57
West Bull Creek	83	Very Good	73	88	80	78	85	92
Eanes Creek	74	Good	56	62	74	87	80	84
Commons Ford Creek	75	Good	74	87	96	57	62	74

Current total EII watershed scores indicate that 20 of 23 watersheds scored “good” or better in total overall EII score in the FY22 reporting period.

Other Water Quality Monitoring

Barton Springs Complex Sediment Monitoring

WPD staff in FY16 completed a new monitoring program to evaluate the spatial and temporal extent of organochlorine and PAH contamination in multiple watersheds in Austin including Barton Creek and published these summary reports in FY17.

http://www.austintexas.gov/watershed_protection/publications/document.cfm?id=276630

http://www.austintexas.gov/watershed_protection/publications/document.cfm?id=283711

Barton Springs Complex Water Quality Monitoring - Biweekly Monitoring

During the reporting period, WPD staff monitored conventional water quality parameters, including physical parameters and nutrients, yielding a total of 12 samples from Barton Springs (see Appendix E).

Barton Springs and Associated Springs – Semi-annual and Annual Monitoring

An expanded list of water chemistry analytes was analyzed from Barton Springs on a quarterly basis. One sample for organic analytes and five samples for ions and metals were collected from Barton Springs in this reporting period. Organic analytes in water at Barton Springs were less than detection limits (see Appendix E).

Barton Springs Continuous Monitoring

A multi-probe data logger has been continually deployed at a spring-fed cave at the bottom of Barton Springs Pool. The units are serviced every three to four weeks for cleaning and recalibration. Field parameter and discharge data continues to be monitored by the United States Geological Survey (USGS) in cooperation with City of Austin staff on a 15-minute interval basis and is available real-time via the web.

(http://waterdata.usgs.gov/tx/nwis/dv?referred_module=sw&site_no=08155500).

Physical parameters including temperature, conductivity, dissolved oxygen, turbidity, and pH may be accessed real-time or as daily averages from the USGS website. The City maintains a contract with USGS. The long-term historic average is 62 ft³/s.

Critical Environmental Feature Protection

During the site development permit application process, WPD reviewed site plans for large-scale residential and commercial development to ensure that Critical Environmental Features (CEF's) are properly identified and buffered from development. WPD staff identified new CEF's during a review of approximately 1,111 site development permit applications. Approximately 271 acres of new protective buffers were established by WPD staff, bringing the cumulative citywide total to approximately 8,888 acres.

 MCM 8 Monitoring Programs FY22 <i>Water Quality and Biological Monitoring</i>				
Activity/BMP	Quantifiable Target	Achievement	Completion	Department
Comprehensive monitoring at Barton Springs and other associated spring outlets	Conduct one monitoring event	1 monitoring event(s) conducted	September 30, 2022	WPD
Barton Springs Pool and Spring Monitoring	Conduct spring outlet and surface water sampling 1 time per month	12 spring outlet and surface water sampling events conducted	September 30, 2022	WPD

v. Floatables Monitoring

Please refer to MCM1 of the Annual Report for information regarding the Floatables Monitoring program.

vi. Impaired Water Bodies and TMDL Requirements

Four Austin Streams

Walnut Creek, Waller Creek, Spicewood Tributary of Shoal Creek, Taylor Slough South

A TMDL was adopted and approved by the TCEQ and EPA in 2015 for 9 TMDLs in Four Austin Streams. The entire water bodies of each creek were included in the TMDL except for Waller Creek. Construction of the Waller Creek Flood Control Tunnel and associated redevelopment drastically changed the hydrodynamics of the lower portion of Waller Creek.

An Implementation Plan (I-Plan) was approved by the TCEQ and EPA in 2015 and the City of Austin participated in its implementation until its expiration in 2020. Stakeholders began meeting in June 2021 to work on the development of a new I-Plan. Local MS4 Operators that have jurisdictional areas along at least one of the creeks and interested stakeholders and community members engaged in developing strategies to reduce bacteria levels so that the creeks may be safe to use recreationally. The I-Plan was approved and published August 24, 2022.

During the reporting period, the following activities were accomplished in the 4 Streams TMDL areas:

Wastewater Infrastructure and OSSFs

 TMDL Measures - Four Streams FY22 <i>Wastewater Infrastructure and OSSFs</i>				
Activity/BMP	Quantifiable Target	Achievement	Completion	Department
Respond to wastewater emergencies	Respond to overflow emergencies within 1 hour 95%* of the time.	379 Emergency response incidents. 93% of emergencies responded to within 1 hour	September 30, 2022	AW
Inspect City Owned Lift Stations	Inspect 100% of City lift stations	113 City Lift stations 100% inspected weekly	Weekly	AW
Investigation and Enforcement Actions (customer driven)	Respond to 100% of complaints or notices of potential violation	2 complaint investigations conducted, and 2 complaint notices received (100%)	September 30, 2022	AW
Investigation of illegal discharges (customer driven)	Respond to 100% of complaints or notices of potential violation	2 complaint investigations conducted, and 2 complaint notices received (100%)	September 30, 2022	AW

*AW will always strive to maintain a 1-hour response time, 95% of the time; however, in the event of a shortage of multiple staff members, weather emergencies, or other unforeseen extenuating circumstances, it will be attained 90% of the time.

AW had major emergencies occurring simultaneously during the reporting period which made the 1-hour response time goal difficult to achieve.

Animal Sources

 TMDL Measures – Four Streams FY22 <i>Animal Sources</i>				
Activity/BMP	Quantifiable Target	Achievement	Completion	Department
Scoop the Poop	Fulfill 100% of requests from the Parks and Recreation Department for pet waste bags and dispensers	3,672,000 pet waste bags provided to PARD 123 pet waste bag dispensers provided to PARD	September 30, 2022	WPD
Scoop the Poop	Support one tabling event at Walnut Creek Metro Park which is an off-leash dog park	N/A	September 30, 2022	WPD
Scoop the Poop	Check and maintain 1 kiosk at Walnut Creek Metro Park	N/A	September 30, 2022	WPD
Scoop the Poop	Mail information to pet-friendly business and pet-friendly apartments	169 mailouts to pet-friendly businesses 75 mailouts to pet-friendly apartments	September 30, 2022	WPD

WPD staff scheduled three tabling events at Walnut Creek Metro Park; however, all events were rained out. Walnut Creek programs (newly added to the 2022 approved SWMP) are planned for FY23.

Residential Education

 TMDL Measures – Four Streams FY22 <i>Residential Education</i>				
Activity/BMP	Quantifiable Target	Achievement	Completion	Department
Elementary School: Earth Camp and Earth School	Offer Earth Camp or Earth School to 100% of AISD Elementary Schools each school year	Earth Camp or Earth School offered to 100% of AISD Elementary Schools	September 30, annually	WPD
Public Outreach-Stop the Blob!	4 outreach events City-wide	8 outreach events conducted	September 30, annually	AW
Provide apartment complexes information related to Stop the Blob!	Offer to provide information (door hangers, flyers) about proper FOG disposal to each apartment complex that has a grease related SSO.	Handouts and items to help properly dispose of FOG were provided to apartments after an SSO	Within a month of confirmation of a grease related SSO.	AW

Illicit Discharge Detection and Elimination – Dry Weather Screening

 TMDL Measures – Four Streams FY22 <i>Illicit Discharges, Detection and Elimination</i>				
Activity/BMP	Quantifiable Target	Achievement	Deadline	Department
Dry Weather Screening	Screen 20 outfalls	81 outfalls screened	September 30, 2022	WPD

Homeless Encampments

 TMDL Measures – Four Streams* FY22 <i>Homeless Encampments</i>				
Activity/BMP	Quantifiable Target	Achievement	Completion	Department
Provide educational pamphlets to new individuals that are encountered	Provide 30 pamphlets	28 Pamphlets provided	September 30, 2022	WPD
Maintain portable toilets in the Walnut and Waller Creek Watersheds	Maintain 4 portable toilets in Walnut and/or Waller Creek Watersheds	2 portable toilets maintained	September 30, 2022, FY23	APH
WPD Project Manager Position	Fund 1 WPD full time employee for field responses related to homeless concerns.	Funded 1 WPD and 1 PARD full time employees related to homelessness concerns	Through September 30, 2022	WPD

**These targets will be established Walnut Creek Waller and/or Waller Creek Watersheds. Significant homeless populations historically do not reside in Taylor Slough South or the Spicewood Tributary of Shoal Creek. Data also suggests that limited populations reside in the TMDL portion of Waller Creek.*

The SWMP was not approved until August 25, 2022, leaving one month left in the reporting period. Two portable toilets were stationed in the Waller Creek Watershed; however, there was inadequate time to contract and station two others by the end of FY22 (September 30, 2022). Two portable toilets were, however, stationed in the Williamson Creek Watershed.

Gilleland Creek

A TMDL was adopted by the TCEQ in 2007 and approved by the EPA in 2009 for the Gilleland Creek Watershed due to concentrations of indicator bacteria exceeding the criteria used to evaluate attainment of contact recreation use. An I-Plan was approved by the TCEQ and EPA in 2011 and revised in 2017. The City of Austin has participated in its implementation since its inception.

During the reporting period, the following activities were accomplished:

Residential Education

 TMDL Measures – Gilleland FY22 <i>Residential Education</i>				
Activity/BMP	Quantifiable Target	Achievement	Completion	Department
Public Outreach- Stop the Blob!	4 outreach events City-wide	8 outreach events conducted	September 30, 2022	AW
Provide multi-family household informational materials related to Stop the Blob!	Offer to provide informational materials (door hangers, flyers, etc.) about proper FOG disposal to each multi-family household facility that has a grease related SSO.	Handouts and complimentary items to help properly dispose of FOG (collapsible funnels, can lids, pan scrapers, etc.) were provided at to apartment complexes following an SSO	Within a month of confirmation of a grease related SSO.	AW

Illicit Discharge Detection and Elimination

 TMDL Measures – Gilleland Creek <i>Illicit Discharge Detection and Elimination</i> FY22				
Activity/BMP	Quantifiable Target	Achievement	Deadline	Department
Dry weather screening of outfalls with a diameter $\geq 36"$ in <i>Gilleland Creek</i> TMDL area (16 outfalls total)	20% (~3 outfalls) per year, until all outfalls have been screened once in the permit term	4 outfalls screened	September 30, 2022	WPD

Wastewater Infrastructure and OSSFs

 TMDL Measures – Gilleland Creek Wastewater Infrastructure and OSSFs FY22				
Activity/BMP	Quantifiable Target	Achievement	Completion	Department
Respond to wastewater emergencies	Respond to overflow emergencies within 1 hour 95% of the time.	379 Emergency response incidents. 93%* of emergencies responded to within 1 hour	September 30, 2022	AW
Inspect City Owned Lift Stations	Inspect 100% of City lift stations	113 City Lift stations 100% inspected weekly	Weekly	AW
Investigation and Enforcement Actions (customer driven)	Respond to 100% of complaints or notices of potential violation	2 complaint investigations conducted, and 2 complaint notices received (100%)	September 30, 2022	AW
Investigation of illegal discharges (customer driven)	Respond to 100% of complaints or notices of potential violation	2 complaint investigations conducted, and 2 complaint notices received (100%)	September 30, 2022	AW

*AW will always strive to maintain a 1-hour response time, 95% of the time; however, in the event of a shortage of multiple staff members, weather emergencies, or other unforeseen extenuating circumstances, it will be attained 90% of the time.

AW had major emergencies occurring simultaneously during the reporting period which made the 1-hour response time goal difficult to achieve.

Gilleland and Four Streams Watersheds

 TMDL Measures – All TMDL Watersheds Wastewater Infrastructure FY22				
Activity/BMP	Quantifiable Target	Achievement	Completion	Department
MSI inspection pipes of lines 24” and larger in the CWQZ in Gilleland Creek, Spicewood Springs, Taylor Slough South, Waller Creek, and Walnut Creek.	129,000 linear feet	54,813 linear feet inspected in FY22 65,035 total linear feet inspected	By September 30 of 2024	AW
TV Inspection of the sewer pipes in the CWQZ in Gilleland Creek and Spicewood Springs	39,500 linear feet	30,875 linear feet inspected in FY22 56,064 total linear feet inspected	By September 30 of 2022	AW
TV Inspection of the sewer pipes in the CWQZ in Taylor Slough South and Waller Creek	21,500 linear feet	27,072 linear feet inspected in FY22 86,399 total linear feet inspected	By September 30 of 2023	AW
TV Inspection of the sewer pipes in the CWQZ in Walnut Creek	555,000 linear feet	163,517 linear feet inspected in FY22 252,951 total linear feet inspected	By September 30 of 2026	AW

Benchmark Assessment

The City utilizes the Waste Load Allocations (WLA) as identified in the two approved TMDLs, Four Austin Streams and Gilleland Creek. WLAs were determined for each sampling event and compared to the benchmark.

All events were below the benchmark values. No BMPs changes are being proposed.

Four Austin Streams

Waste Load Allocations (WLA_{SW}) for Indicator Bacteria in Four Austin Streams

Assessment Unit	Site Name	Date	E COLI BACTERIA (MPN/100ML)	Flow (cfs)	WLA	Site Average (Billion MPN/day)
1403J_01	Spicewood Tributary of Shoal	1/27/22	238	0.24	1.4	0.53
1403J_01	Spicewood Tributary of Shoal	3/29/22	72.3	0.05	0.09	
1403J_01	Spicewood Tributary of Shoal	9/28/22	95.9	0.04	0.09	
1403K_01	Taylor Slough South @ Reed Park	1/27/22	98.5	0.12	0.29	0.99
1403K_01	Taylor Slough South @ Reed Park	3/29/22	1120	0.08	2.19	
1403K_01	Taylor Slough South @ Reed Park	9/28/22	1990	0.01	0.49	
1429C_03	Waller Creek @ Shipe Park	1/27/22	2420	0.01	0.59	0.21
1429C_03	Waller Creek @ Shipe Park	3/29/22	120	0.01	0.03	
1429C_03	Waller Creek @ Shipe Park	9/28/22	27.5	0.001	0	
1429C_02	Waller Creek Upstream of 23rd Street	1/27/22	548	0.29	3.89	7.61
1429C_02	Waller Creek Upstream of 23rd Street	3/29/22	727	0.89	15.83	
1429C_02	Waller Creek Upstream of 23rd Street	9/28/22	579	0.22	3.12	
1428B_05	Walnut Creek @ MoPac/Loop 1	3/29/22	1	0.1	0	NA
1428B_041	Walnut Creek Downstream of IH35	3/28/22	116	1.87	5.31	NA

*Some monitoring events were not included because there was no flow at the time of monitoring; therefore, a WLA could not be calculated.

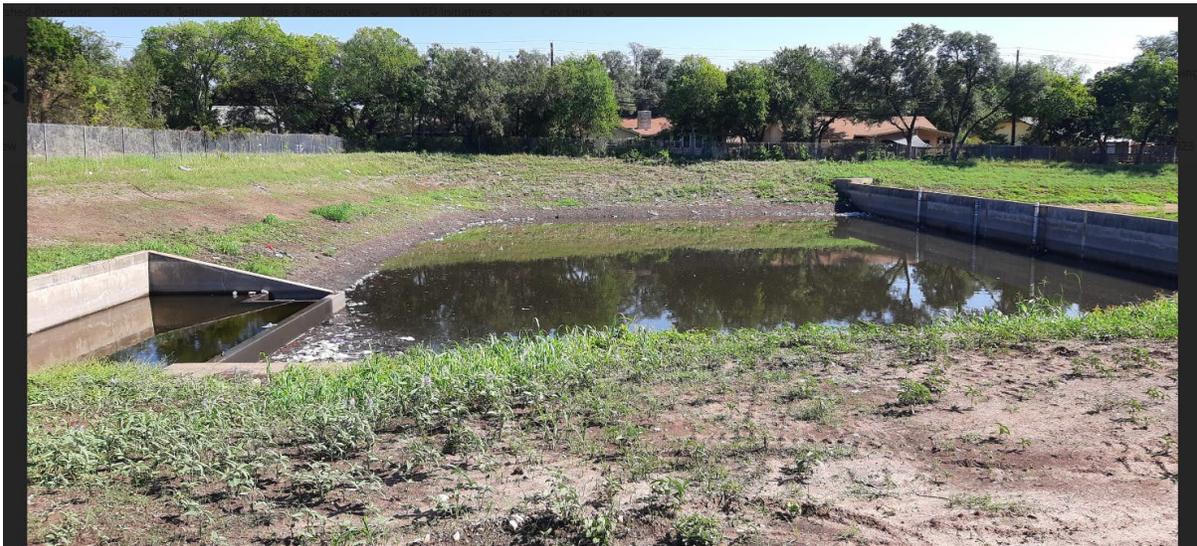

Gilleland Creek

No samples were obtained in Gilleland Creek during the reporting period.

TMDL and Impaired Waterbodies Summary

City departments work together to prioritize sites for the clean-up of trash and debris associated with individuals experiencing homelessness. A contract maintained by WPD resulted in the removal of 167.4 tons of trash and debris. Additionally, another contract maintained by WPD resulted in the removal of 264,000 lbs of trash and debris from WPD assets. HEAL moved 220 individuals into shelter during FY22.

Projects were conducted in Waller and Walnut Creek watersheds to stabilize banks, reduce erosion, and improve the functioning of ponds. Further capital Improvement Projects have been funded and are in the planning phase along Waller and Walnut Creeks to advance missions to protect the community from flooding, erosion, and water pollution.

Walnut Creek - 4700 Seton Center Parkway Pond

Proposed SWMP Modifications

The City of Austin will continue to monitor and assess the ecological integrity of watersheds through implementation of the Environmental Integrity Index (EII) program as it has in the past. The EII will continue to be a comprehensive base-line monitoring program that collects data on chemical, physical, and biological parameters to assess the integrity of Austin's urban watersheds in the context of less-impacted suburban and rural watersheds. However, the EII has recently evolved from a simple monitoring program to a mathematic model-based program fueled by the data collected over the past 25 years with extensive GIS data on the geophysical and anthropogenic characteristics of each watershed. This enables the City to greatly increase the spatial extent and resolution of assessments in addition to contextualizing the annual empirical bioassessment data. The annual data feedback loop will continue to improve the model while also identifying anthropogenic and/or climatic impacts specific to each watershed.

To address concerns regarding historic inequity, the City will shift from reporting data from the seven watersheds that are exclusively on the south and west sides of town to watersheds that are representative of all cardinal regions of town. Protocols for bioassessments (benthic macroinvertebrate and diatom community) will remain the same as in the past. Raw data for all watersheds will be retained in perpetuity in the City of Austin Watershed Resource Monitoring (WRM) database. Specific watersheds and frequency of sampling will change but will remain of same or increased quantity. These changes will be finalized following permit renewal.

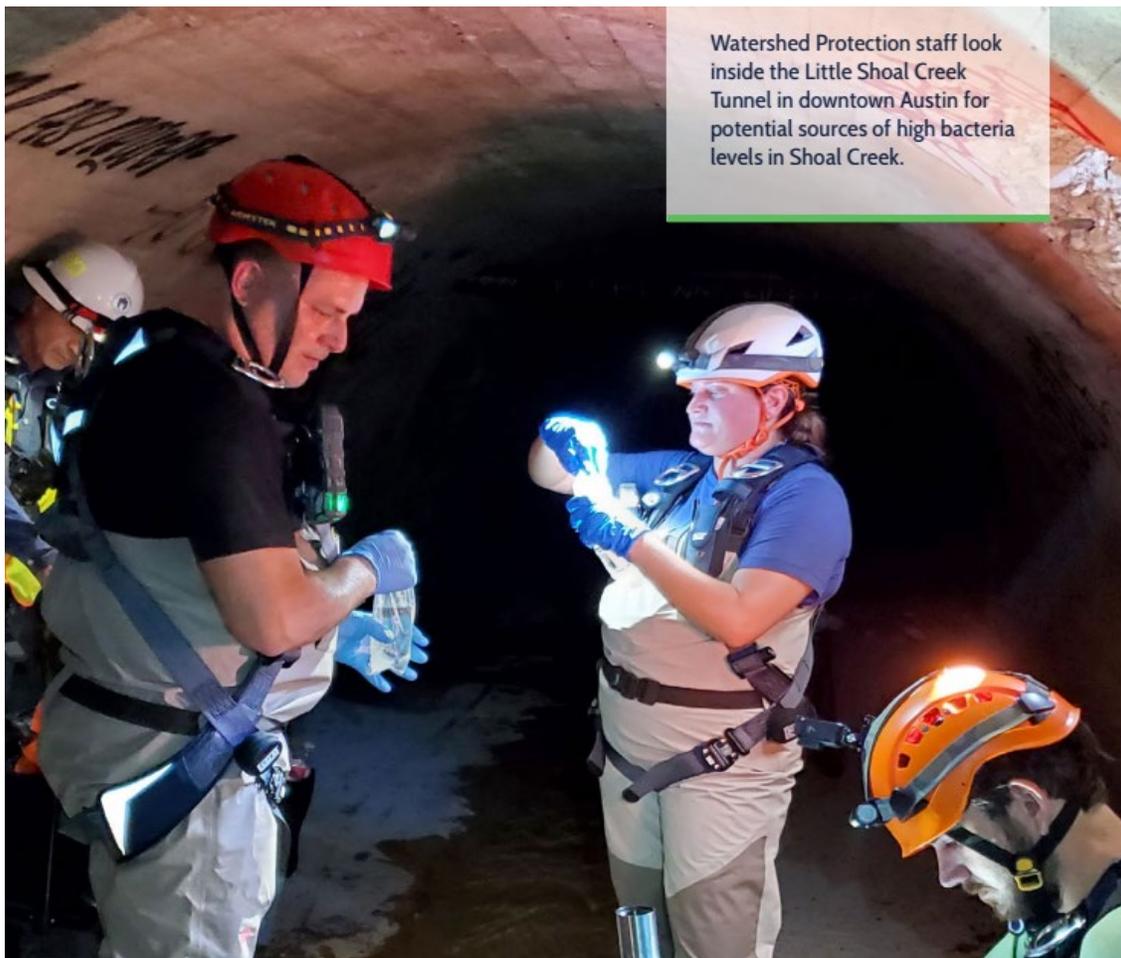

No other changes to the SWMP related to MCM8 programs are being proposed at this time.

APPENDIX A

Water Quality Improvements, Degradations, and Progress Towards Measurable Goals or Measured Reduction in Pollutants

Water Quality Improvements

The City has seen encouraging trends in bacteria reductions in TMDL waterbodies over the last 5 years. Austin Water is implementing a scheduled inspection program in TDML areas. WPD conducts bacteria source isolation investigations in TMDL and other waterbodies to locate leaks. An investigation was conducted during the reporting period on Little Shoal Creek to isolate high bacteria levels. The Watershed Protection Department (WPD) is in the process of pursuing resolution on contamination source leads documented as a result of the investigation.

Water Quality Degradation

Trash in the City full purpose area has increased in recent years. Several departments have implemented programs and established contracts with external vendors to remove trash within their jurisdictional areas. A trash survey was conducted by WPD in FY22 to understand, quantify, and reduce litter and illegal dumping in aquatic resources. Although the study was not able to identify a single source or easy-to-implement solution, it has increased WPD's understanding and provided additional insight into strategies to address this problem.

Measurable Goals Progress

The City has continued to strive to meet and exceed measurable goals. This progress has been detailed in each MCM section within this report. Most goals were met or exceeded during the reporting period. The SWMP was approved with approximately one month left in the reporting period, therefore, not all goals were attainable in the short time frame. The City will continue striving to meet goals in FY23.

Measured Reductions in Pollutants

The City has implemented numerous programs to reduce pollutants in stormwater and improve water quality. The following displays measurements of the City's efforts to reduce pollutants during the FY22 reporting period:

- Collected 2,823 tons of dirt, leaves, and debris from roadways throughout the City.
- Collected 43,479 tons of yard trimmings and compost materials from residential bins.
- Collected 5,636 tons of residential brush and 8,454 tons of residential bulk materials.
- Removed approximately 3.69 tons of floatable trash/debris from 2 floatable booms.
- Removed approximately 29.65 tons of floatable trash and debris from Lady Bird Lake.
- Removed 51 tons of dead animals from roadways.
- Removed 418 tons of waste from City containers and illegally dumped waste from public areas.
- Properly disposed of approximately 1,908,540 pounds of household hazardous waste.
- Recycled 106,207 pounds of waste oil and 1,650 pounds of oil filters.
- Recycled 258,619 pounds of paint.
- Properly disposed of 42,180 pounds of corrosive materials.
- Properly disposed of 774,793 pounds of flammable materials. Recovered approximately 2,824,420 gallons and 283 cubic yards of pollutants during pollution investigations.

APPENDIX B

Annual Expenditures & Assessment of Controls

The City has compiled annual expenditure information for the FY22 reporting period from October 1, 2021 to September 30, 2022 and the proposed budget for the FY23 reporting period from October 1, 2022 to September 30, 2023. The table below is a breakdown of the major elements of the SWMP and reflects current operation budgets of City programs utilized to satisfy the City's TPDES MS4 stormwater permit requirements. The expenditure information may in some cases include expenses for activities not directly required by the permit.

Minimum Control Measure (MCM)	FY22 Actual	FY23 Budget
MS4 Maintenance Activities	\$61,179,939	\$62,990,811
Post-Construction Storm Water Control Measures	\$7,807,621	\$10,426,818
Illicit Discharge Detection and Elimination	\$20,939,540	\$17,452,936
Pollution Prevention/Good Housekeeping for Municipal Operation	\$213,793	\$205,074
Industrial and High Risk Runoff	\$1,174,636	\$1,304,742
Construction Site Stormwater Runoff	\$3,405,208	\$3,032,728
Public Education and Outreach/Public Involvement and Participation	\$6,054,605	\$6,476,164
Monitoring Programs	\$1,940,407	\$2,013,703
Total Expenditures	\$102,715,749	\$102,255,594

No revisions to the assessment of controls or fiscal analysis reported in the permit application are necessary.

APPENDIX C

NPDES & TPDES Notices and COA Inspection Summary

Below is a summary of the number of Notices of Intent, Change, Termination, and Small Construction received from construction site operators and industrial facilities applying for NPDES and TPDES coverage for storm water discharges. The number of inspections conducted by the City of Austin at construction sites and industrial facilities during the reporting period has been included.

During the reporting period, the City received the following permit notices:

TPDES Construction General Permit (CGP) TXR150000

- 83 Notices of Intent
- 44 Notices of Termination
- 69 Construction Site Notices
- 21 Construction Site Notice Termination
- 20 Notices of Change

TPDES Multi-Sector General Permit (MSGP) TXR050000

- 0 Notices of Intent
- 0 No Exposure Certification

TPDES General Permit TXG110000

- 0 Notices of Intent

The WPD also maintains a database of industrial facilities in the City full purpose jurisdiction that have submitted Notices of Intent or No Exposure Certifications to the TCEQ. This information is obtained and updated by referring to TCEQ Central Registry and can be found in MCM5 of this report.

During the reporting period, the following amount of construction and industrial inspections were conducted by the City:

- 26,672 construction inspections at permitted development sites.
- 437 industrial inspections at facilities that store hazardous materials.
- 165 industrial inspections at facilities that may be contributing a substantial pollutant load to the MS4.

Appendix D Representative Monitoring

FY22 EII Benthics and Diatoms
