City Code requires certain facilities to be equipped with oil / grit separators or hazardous material interceptors to receive and treat stormwater runoff and site drainage. The Watershed Protection Department provides free guidance documents to assist those who are required to install these devices. These guidance materials provide information about the minimum design criteria to sufficiently contain spills and provide adequate treatment of stormwater runoff. For more information, call Schuyler Schwarting at 512-974-2715.

This list is compiled from various advertisement listings and company contacts and may not represent all oil / grit separator suppliers that service the Austin area. The Watershed Protection Department does not endorse company products or services and is not responsible for their performance.
